### LETTERS OF TRANSMITTAL

OCTOBER 18, 1974.

To the Members of the Joint Economic Committee:

Transmitted herewith for the use of the Joint Economic Committee and other Members of Congress is a staff study entitled "Federal

Subsidy Programs."

This study identifies and presents current estimates of the costs of Federal subsidy programs. It brings up to date information presented in a staff study, "The Economics of Federal Subsidy Programs," published in 1972.

The views expressed in this document do not necessarily represent the views of the members of the committee or of the committee staff.

Wright Patman, Chairman, Joint Economic Committee.

OCTOBER 15, 1974.

Hon. Wright Patman, Chairman, Joint Economic Committee, Congress of the United States, Washington, D.C.

Dear Mr. Chairman: Transmitted herewith is a staff study entitled "Federal Subsidy Programs." This study presents up to date cost estimates of Federal subsidy programs. It builds on work which the Joint Economic Committee began in 1960 and has updated periodically, the most recent being a 1972 staff study, "The Economics of Federal Subsidy Programs." It identifies new programs which have been added and it includes information on formula grants not readily available elsewhere. This study forms a part of the continuing examination of public expenditure policy conducted by the Subcommittee on Priorities and Economy in Government.

The views expressed in this document do not necessarily represent the views of the members of the committee or of the committee staff.

> WILLIAM PROXMIRE, Chairman, Subcommittee on Priorities and Economy in Government.

> > OCTOBER 10, 1974.

Hon. William Proxmire, Chairman, Subcommittee on Priorities and Economy in Government, Congress of the United States, Washington, D.C.

DEAR SENATOR PROXMIRE: Transmitted herewith is a staff study entitled "Federal Subsidy Programs." It examines the changes in subsidy programs which have occurred since the 1972 staff study "The Economics of Federal Subsidy Programs," it presents current

estimates of the cost of these programs and it summarizes some of the findings of the special subsidy studies that have been presented to the Committee during the past 2 years.

The study was prepared by Mr. Douglas Lee of the committee staff with the assistance of Mary McElroy and John Halebian. Administrative and secretarial work was done by Beverly Park. The special assistance provided by Tax Analysts and Advocates in estimating the cost of tax subsidies and by the Office of Management and Budget in estimating the cost of credit subsidies is greatly appreciated. The special computer runs of the "1974 Catalog of Federal Domestic Assistance" provided prior to its publication by the OMB staff were invaluable in preparing this study and are especially appreciated.

> JOHN R. STARK, Executive Director. Joint Economic Committee.

# INTRODUCTION

In January 1972 the staff of the Joint Economic Committee published the first comprehensive study of the economics of Federal subsidy programs. This study estimated that the cost for fiscal year 1970 of the major subsidies was approximately \$63 billion. In fiscal year 1975 the major subsidies are estimated to cost \$95 billion.

Both the theoretical discussion and the cost estimates presented in the 1972 study have proved very helpful to congressional users and private economists. The definition of a subsidy proposed in that study has been largely accepted by the economics profession as a conceptu-

ally correct and workable standard for economic analysis.

The present study summarizes some of the findings of special studies made for the Joint Economic Committee, brings up to date the cost estimates that were presented in the earlier study, and presents some additional information on credit subsidies. In a few cases better and more complete information allows more accurate estimates to be made, but in many others information has been aggregated in such a fashion that it is impossible to accurately estimate the cost of an individual program. Unfortunately there has been no information developed which would allow a comprehensive examination of the purchase and regulatory subsidies.

By way of review, a subsidy is defined as the provision of Federal economic assistance, at the expense of others in the economy, to the private sector producers or consumers of a particular good, service or factor of production. The Government alters the price or cost of the good, service, or factor as a quid pro quo for certain economic behavior by the recipient, either in the form of inducing the performance of economic activity or the forebearance of it. The assistance may take

the form of:

(a) Explicit cash payments;

(b) Implicit payments through a reduction of a specific tax liability;

(c) Implicit payments by means of loans at interest rates below the Government borrowing rate or from loan guarantees;

(d) Implicit payments through provisions of goods and services at

prices or fees below market value;

(e) Implicit payments through Government purchases of goods and services above market price; and

(f) Implicit payments through certain Government regulatory

actions that alter particular market prices.

Over the past 2 years the Joint Economic Committee has published approximately 40 special studies, many of which examine particular subsidy programs. Three standards have been used to determine the relative merits of an indivudual subsidy program. They are:

(1) Does the subsidy correct a market deficiency?

(2) Is the subsidy efficient in terms of the costs required to obtain

the desired benefits?

(3) Does the subsidy distribute its benefits to low, middle, and high income beneficiaries in a pattern that is acceptable to society?

If some or all of these questions can be answered affirmatively then a strong case can be made for retaining the subsidy. However, most of the studies submitted to this Committee found that these standards were not met.1

Several studies addressed the first question: Does the subsidy correct a market deficiency? For example, Gerard Brannon examined the 7 percent investment tax credit to determine its usefulness in reducing high unemployment rates.2 He estimated that the tax credit would reduce unemployment by 0.1 percent in one year and 0.3 percent over a 2½ year period. He therefore concluded that the investment tax credit does not correct the market deficiency of high unemployment rates as its proponents originally argued, although it may address other market deficiencies. In another study Martin David and Roger Miller examined the favorable treatment of capital gains by our tax laws.3 This provision supposedly prevents unfair taxation because of widely fluctuating capital gains income from year to year, and it protects persons from being "locked-in" to a particular portfolio. David and Miller argue that over a long period of time the variability of capital gains relative to adjusted gross income is quite small, and the capital gains realizations do not appear to decline in frequency or amount among taxpayers of increasing age. Their conclusion is that the market deficiency the capital gains subsidy is intended to correct really does not exist.

A study by Gerald Jantscher examined the maritime subsidies.4 This subsidy was originally supposed to correct problems that would result from the lack of a U.S. domestic fleet. Over time the justification for continuing the subsidy has shifted to some extent to emphasis on enhancing our national defense. Jantscher argues that the case for a national defense contribution is very poor. He concludes that while maritime subsidies may have been intended to correct a market de-

ficiency at one time, by 1972 this was no longer true.

Some of the studies were primarily addressed to the second question: Is the subsidy efficient? Edward Erickson and Stephen Millsaps examined the tax incentives for petroleum exploration to see whether they significantly increased our petroleum reserves. They found that an annual cost to the U.S. Treasury of \$1.4 billion generated only \$150 million in additional petroleum reserves. Their conclusion states that "the concensus of professional economic opinion is relatively certain that the special tax provisions (for petroleum) result in an inefficient allocation of resources, a smaller national income, and questionable income distribution effects." 5 A study by William Tye looked at the efficiency of the capital grant subsidy for urban mass transportation.6 He estimated that over the long run, 22 percent of the Federal

<sup>1</sup> A more complete summary of these findings and additional discussion may be found in Jerry J. Jasinowski, "The Case for Subsidy Reform," a paper presented to a Joint Session of the Association for the Study of the Grants Economy and The American Economic Association, December 30, 1972, mimeographed.

2 Gerard Brannon, "The Effects of Tax Incentives for Business Investment: A Survey of the Economic Evidence" in The Economics of Federal Subsidy Programs, Part 3—Tax Subsidies, a compendium of papers Submitted to the Joint Economic Committee, July 15, 1972.

3 Martin David and Roger Miller, "The Lifetime Distribution of Realized Capital Gains" in The Economics of Federal Subsidy Programs, Part 3—Tax Subsidies, a compendium of papers submitted to the Joint Economic Committee, July 15, 1972.

4 Gerald R. Jantscher, "Federal Aids to the Maritime Industries," in The Economics of Federal Subsidy Programs, Part 6—Transportation Subsidies, a compendium of papers submitted to the Joint Economic Committee, February 26, 1973.

5 Edward W. Erickson and Stephen W. Millsaps, "Taxes, Goods, and Efficiency: Petroleum and Defense" in The Economics of Federal Subsidy Programs, Part 3—Tax Subsidies, a compendium of papers submitted to the Joint Economic Committee, July 15, 1972.

8 William B. Tye, "The Capital Grant as a Subsidy Device: The Case Study of Urban Mass Transportation" in The Economics of Federal Subsidy Programs, Part 6—Transportation Subsidies," A compendium of papers submitted to the Joint Economic Committee, February 26, 1973.

subsidy is wasted because cities are encouraged to replace buses before

The third standard for measuring the merits of a subsidy program relates to its distributional effect: Does the subsidy distribute its benefits to different income groups in a manner that society finds acceptable? Joseph Pechman and Benjamin Okner examined the overall distributional effects of the personal income tax. They found that families with incomes below \$5,000 a year receive about 1.4 percent of all personal tax benefits, families with incomes between \$5,000 and \$10,000 per year receive about 8.5 percent of all tax benefits, and familites whose income exceeds \$50,000 per year receive about 24 percent of the tax benefits. A similar distributional analysis of major Federal housing subsidies was prepared by Henry Aaron.8 He concluded that when housing tax subsidies are considered along with the direct housing programs for low income people, the total effect is to provide more direct assistance to middle and upper income households than to low income households. He also states: "Moreover, all housing programs intended for low and lower middle income households provide large amounts of help to a small fraction of eligible households and no direct help at all to all the rest."8

Although the studies mentioned above are only a small sample, they are representative of the general findings of the papers submitted to the Joint Economic Committee. On the whole, these studies showed that many subsidies do not work well economically, they are often directed at outmoded or non-existent objectives, they redistribute income to the affluent, and in too many cases their costs far exceed their benefits to society as a whole. These studies make a very strong case for major subsidy reform.

Apart from judging a subsidy by the three criteria discussed above, several studies have indicated that Federal subsidies can cause inflation. For example, Buy American policies have been justified on the grounds that they aid domestic producers, create jobs, and improve the U.S. balance of trade. A study by David Richardson concluded that "decreased purchases of imports and increased purchases of domestic goods by the Government sector tends to lower import prices and raise domestic prices, leading the private sector to substitute away from domestic suppliers and toward imports." Another study by George Hilton examined the subsidy that results from the Interstate Commerce Commission's regulation of transportation. 10 He considers \$4.8 billion to be a conservative estimate of the annual loss to the economy caused by the ICC's cartelization of the transportation industry. This loss must be reflected in higher prices for all goods which move in interstate commerce.

The Joint Economic Committee has recently recommended the establishment of a commission, appointed jointly by Congress and the President, to recommend comprehensive legislation to eliminate both

10 George W. Hilton, "The Costs to the Economy of the Interstate Commerce Commission," The Economics of Federal Subsidy Programs, Part 6—Transportation Subsidies, a compendium of papers submitted to the Subcommittee on Priorities and Economy in Government of the Joint Economic Committee, February 26, 1973.

February 26, 1973.

governmental and private barriers to an efficient market economy. The studies made for this Committee have documented very clearly ways in which government subsidies prevent efficient market operations and increase prices. This commission should carefully consider 1 ederal subsidy

programs along with other government barriers to efficient trade.

When the JEC staff first tried to estimate the cost of subsidy programs, we were surprised to find that the Federal Government directly influences microeconomic activity to such a large extent. The \$63 billion estimate we prepared was very conservative and did not attempt to measure the cost of regulatory activity which is probably the most significant Federal intervention at the microeconomic level. Although the present study has not expanded the scope of our original estimates, it shows how the government's influence has continued and in some areas has increased. In this five year period, both total subsidy costs and the overall economy are estimated to grow about 55 percent.

An examination of the aggregate figures alone is insufficient because it hides the trends in different types of subsidy expenditures. Direct cash payments, for example, have grown relatively little from about \$11.6 billion in 1970 to about \$12.3 billion in 1975. Some of these subsidies, particularly those for agriculture, have declined significantly. Tax subsidies, however, have increased about \$20 billion in this five-year period, to a total of \$60 billion. Benefit-in-kind subsidies have mushroomed 130 percent so that in 1975 they are estimated to cost \$20 billion.

An important conclusion emerges if changes in subsidy costs are related to the Federal budget process. The largest percentage increases have occurred in programs such as Food Stamps, Medicare, and Medicaid. These programs are considered uncontrollable in the budget because any person who meets certain qualifications is entitled to receive the benefits. In order for the government to reduce spending in this area it must reduce the level of benefits available to everyone or change the qualifications so that fewer people are eligible. The largest absolute increase has occurred in tax subsidies. Tax expenditures are not included in any budget and therefore they are not reviewed on a systematic and regular basis. 11 Credit subsidies declined from \$4 billion in 1970 to about \$3.0 billion in 1975 due primarily to a \$1.8 billion reduction projected for housing subsidies. 12 Other agencies such as the Export-Import Bank, the Rural Electrification Administration and the Rural Telephone Bank which have increased their subsidies significantly, have been explicitely removed from the U.S. Budget. After it was excluded from the annual scrutiny that is part of the budget process, Export-Import Bank's new loan commitments increased more than five times. An unavoidable conclusion emerges from this analysis: Over a 5-year period, most programs that are included in the regular budgetary review process increase relatively little and there are some important declines. The programs that are considered uncontrollable in the budget and the programs that are not included in the regular budget review at all show major increases. The following summary table shows these major trends.

<sup>&</sup>lt;sup>11</sup> Recently enacted legislation will require the inclusion of these estimates in the budget submitted in fiscal year 1977 and the following year.
<sup>12</sup> As fiscal year 1975 progresses, the planned reduction in housing subsidies seems less likely. Therefore this estimate may be revised substantially.

### ESTIMATES OF SUBSIDY COSTS<sup>1</sup>

### A. Direct Cash Payments

This form of a subsidy is simply a cash payment from the Government to a private sector firm or individual that has engaged in a market activity as specified by the subsidy law. This includes such things as payments to produce certain crops, attend school, and build houses.

Table 1 lists the major cash payment subsidies and estimates their gross budgetary costs for fiscal years 1970–75. The figures presented are obligations and were taken from various issues of the "Catalog of Federal Domestic Assistance" and "The Budget of the United States Government" including the "Appendix" and the "Special Analyses." The data presented was the most recent available as of June 1974.

### B. Tax Subsidies

A tax subsidy is a special provision in the law which allows an individual or a firm that engages in a specific market activity to make a smaller tax payment to the Government than he would have otherwise made. The estimates presented here are an attempt to measure the amount that the Government loses by allowing this smaller payment.

Table 2 lists the major tax subsidies and estimates the loss to the Government. The estimates for fiscal years 1970-73 were prepared by the staffs of the Treasury Department and the Joint Committee on Internal Revenue Taxation. Those for fiscal years 1974-75 were

prepared by the Tax Analysts and Advocates.

<sup>1</sup> Except where noted, all estimates were prepared by Tax Analysts and Advocates (TA/A). Estimates for 1974 assume a \$1,287,000,000,000 GNP. Real GNP, in 1958 dollars, was estimated at \$837,000,000,000.

2 Changes in the 1973 figures as compared to 1972 which are due wholly or in part to revised data and/or new sources of

data and/or improved estimating methods.

9 Does not include housing.

10 Does not include farming and timber which are listed separately.
11 This estimate is taken from the "Annual Report of the Secretary of the Treasury," fiscal year 1968, p. 333. That report estimates the revenue loss for fiscal year 1968 to be in the range of \$5,500,000,000 to \$8,000,000,000.

12 Does not include education.

13 The estimate of each tax subsidy has been made independently of any other tax item. If 2 or more items were eliminated simultaneously, the resulting revenue change might be larger or smaller than the sum of the amounts shown for individual items. Therefore this total is not intended to be exact, but only to give an estimated order of magnitude.

Note: Standard estimating practice is to regard the differences between calendar years and the following fiscal years as not major, except in special cases. Therefore calendar year estimates may be taken as approximations of fiscal year figures. This change has been made so that data on tax subsidies can be compared to data on other forms of subsidy.

### C. Credit Subsidies

A credit subsidy may exist whenever the Government enters a loan transaction to lower the rate of interest below what the borrower would otherwise pay. This type subsidy is more complicated than others because it can take several forms, and it may or may not involve a cost to the Government.

The subsidy may be a simple cash payment to offset part of the interest cost of the loan. An example of this would be an educational loan to students with the Government paying the interest charges while the student remains in school.

data and/or improved estimating methods.

3 Figures unavailable.

4 Estimates provided by the Office of Tax Analysis, U.S. Treasury.

6 Estimates prepared by TA/A based on estimates of net rent contained in the NIA as the amounts which would be added to gross income. An alternative estimate published in Henry Aaron's study, "Income Taxes and Housing," the American Economic Review, December 1970, p. 793, is that this provision costs \$4,000,000,000 per year.

6 Estimates for years 1972–75 consider this tax subsidy in isolation rather than in conjunction with percentage depletion as has deen done for 1970–71, therefore direct comparisions are not proper.

7 This item is being superseded by use of the investment credit.

8 Equipment placed in service and rehabilitation outlays in the latter half of fiscal year 1975 are not eligible for such accelerated depreciation.

Another type of credit subsidy is a direct loan from the Government at an interest rate below what the borrower would pay in the private credit market. When the loan is made at an interest rate below that which the Government must pay to borrow money, there is clearly a cost to the Government. However, sometimes loans are made at an interest rate that is equal to or above the rate paid by the Government. In this case the loan may cost the Government nothing and may even return a profit, but if the borrower would have had to pay more in the private credit market he still receives substantial benefits. The only way this activity might add to governmental costs would be if the Government's additional demands on the credit markets raised the interest rate on all Government borrowings. That estimate is not attempted in the present study.

A third type of credit subsidy involves a governmental guarantee or insurance of a private loan. If the loan is repaid, the Government's cost is zero, but the borrower is charged a lower rate of interest because the governmental guarantee lowers the risk of default. The cost to the Government occurs only when a borrower defaults and the Government must repay the loan. In some cases the Government establishes an insurance fund to which the borrower contributes to cover antici-

pated defaults.

In accordance with widely accepted practice, the subsidy cost estimates are the capitalized value of the difference between what the Government must pay to borrow and what the borrower is charged. In other words, we are measuring the value of the stream of payments the Government must make to offset what the credit recipient himself has not paid over the life of the loan. The interest rate used to represent the cost of Government borrowing is the average rate on 3-5-year Government securities.2 Table 3 lists the major credit subsidies and estimates their costs. These estimates were prepared by the Office of Management and Budget based on information provided by the executive agencies. Since the information was collected for budget analysis purposes rather than to estimate costs, the estimates should not be considered precise. They are reasonable orders of magnitude.3

Table 4 represents estimates that attempt to measure the benefits to the borrower of the major credit subsidies. In order to do this, we have chosen a higher interest rate that is intended to represent what the borrower might have had to pay to borrow the money without Government assistance. The rates chosen are very conservative and will undoubtedly underestimate benefits. In fact, some credit recipients would be unable to borrow at any price without Government assistance.

<sup>&</sup>lt;sup>2</sup> The actual cost of Government borrowing, and hence the cost of the subsidy, may change over the life of a loan. For example, if the Government makes a 30-year loan it will refinance the loan several times before repayment. Because it is impossible to foresee the rate at which the refinancing will occur, a constant rate is assumed. This assumption is satisfying from a conceptual point of view because the cost estimate then represents the size of the commitments the Government thinks it is making at the time it makes that commitment. Discount rates used were: 1970, 7.5 percent; 1971, 5.75 percent; 1972, 5.75 percent; 1973, 7 percent; 1974, 7.5 percent; 1975, 7.5 percent.

<sup>3</sup> The information available on many credit subsidies has been aggregated in such a fashion that it is not possible to determine accurately the cost of an individual program. This suggests that cost may not be a primary consideration for the legislative branch when enacting or extending the program or for the executive branch when managing it.

These estimates are useful, however, because they provide some crude idea of the large difference between the cost of credit subsidies to the Government and the benefit to the borrower.<sup>4</sup>

### D. Benefit-in-Kind Subsidies

A benefit-in-kind subsidy exists when the Government sells to the private sector a good or service at a price below market value or below cost in cases where no private market exists. Clearest examples of a benefit-in-kind is the food stamp program: the Government sells coupons to individuals which have a market value above the price charged. In some cases the distinction between a benefit-in-kind and another form of subsidy is rather arbitrary because the Federal Government may provide a cash payment or credit to another level of government or to a private agency which then provides a good or service to the ultimate beneficiary.

Table 5 lists the major benefit-in-kind subsidies and presents estimates of their cost. Several subsidies such as surplus property disposal, were omitted from the list because cost estimates were not available.

<sup>3</sup> Jeremy J. Warford estimates that subsidies to general aviation are approximately \$640 million annually. See Jeremy J. Warford, "Subsidies to General Aviation," "The Economics of Federal Subsidy Programs, Part 6—Transportation Subsidies," A Compendium of Papers Submitted to the Subcommittee on Priorities and Economy in Government of the Joint Economic Committee, February 26, 1973.
<sup>4</sup> This estimate is considered representative of annual costs. It will change with changes in the interest rate.

<sup>6</sup> Individual items may not add to totals due to rounding error.

Source: "Report on a Study of tax and loan accounts," Department of the Treasury, June 1974.

### DESCRIPTION OF SUBSIDY PROGRAMS

This section contains a brief description of each of the major subsidy programs included in the study. They are grouped according to the private sector area where they have their most direct impact. This type of grouping shows the overlap between subsidy programs and allows comparison of the various ways subsidies are given in a single economic area. In some cases the assignment given an individual program is arbitrary.

### **Data Format Information**

The individual program writeups generally follow the format on the data sheet below. The interest rate and maturity line is of course dropped for noncredit subsidies. Because of a lack of information, the tax subsidy format is more drastically altered to only include the authorization, description, and subsidy costs. The sections following the tax authorization refer to the Internal Revenue Code; the descriptions include both an explanation of how the tax subsidy works and a statement of objective if available; the tax subsidy cost is measured in revenue loss. Where applicable, a description of the distribution formula has been provided.

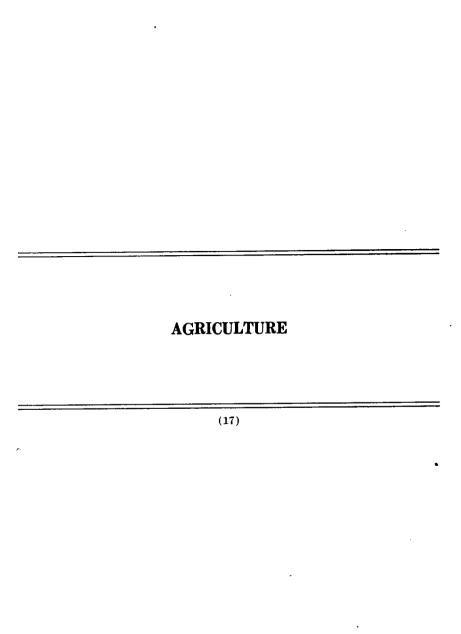

A sample of the standard data format follows below.

# PROGRAM TITLE Administering agency... This is the department and its subdivision responsible

000	for managing the particular program.
Identification	Authorization: This is the legal authority upon which
	the subsidy is based.
	Budget account: This is the identification code listed
	in the budget.
	CFDA: This is the number(s) of the program as listed
	in the Catalog of Federal Domestic Assistance.
Objectives	These are the goals toward which the managing agency
•	indicates the program is directed.
Financial form	The basic financial forms of a subsidy are direct cash
	payments, tax liability reductions, credit aids, and
	benefit-in-kind. Additional information is placed
	in parenthesis when it can be helpful.
Direct recipient	This is the first private recipient to feel the impact of
	the subsidy.
Interest rate and ma-	This information is included only for credit aids. The
turity.	interest rate is the rate used to calculate the subsidy.
	Where rates vary within a program, the one listed
	is an estimated average. Where insurance premiums
	are charged, they have been included in the interest
	rate.
	Information on the insurance premium is included where applicable.
	The maturity is the average time period for which the

loan is made. This is the time period used in cal-

Description	This has been included for tax subsidies in lieu of
	objectives and direct recipient. Of course there is no administering agency, budget account or CFDA.
Distribution formula	This is a description of the formula used to distribute
	the Federal funds including matching requirements where applicable.
Subsidy costs	This is an approximation of the obligations associated with the program. For credit aids this will include
	the capitalized value of the loan if the Government
	borrowing rate were 7½ percent in 1970, 5¾ percent
	in 1971, 5\% percent in 1972, 7 percent in 1973, 7\%
	percent in 1974, and 7½ percent in 1975.

# FARMING: EXPENSING AND CAPITAL GAINS TREATMENT

Authorization\_\_\_\_\_

(After Tax Reform Act of 1969) Section 1251-Gain from disposition of property used in farming where farm losses offset nonfarm income. Section 1245—Gain from disposition of certain depreciable property. Section 1231—Property used in the trade or business and involuntary conversions. Section 1031— Exchange of property held for productive use or investment. Section 270—Limitation on deductions allowable to individuals in certain cases, replaced by section 183—Activities not engaged in for profit. Section 278—Capital expenditures incurred in planting and developing citrus groves.

Financial form\_\_\_\_\_

Tax subsidies.

Description\_\_\_\_\_

Farmers, including corporations, may deduct certain costs as current expenses even though these costs represent inventories on hand at the end of the year or capital improvements. For example, the cost of producing crops or raising livestock may be deducted as an expense even if not sold by the end of the tax year. Certain capital improvements are also deductible during the year incurred rather than capitalized and depreciated. This treatment also extends to the sale of orchards, vineyards and comparable agricultural activities.

Although the special farm accounting rules were adopted to relieve farmers of bookkeeping burdens, these rules were used by some high-income taxpayers who were not primarily engaged in farming to obtain a tax, but not an economic, loss which was then deducted from the high-bracket, nonfarm income. In addition, when these high-income taxpayers sold their farm investment, they often received capital gains treatment on the sale. The combination of the current deduction against ordinary income for farm expenses of a capital nature and the capital gains treatment available on the sale of farm assets produced significant tax advantages and tax savings for these high-income taxpayers. "General Explanation of the Tax Reform Act of 1969," p. 90. After the Tax Reform Act of 1969, capital gains from

the sale of farm assets may be taxed as ordinary income to the extent farm losses (over \$25,000) previously reduced nonfarm income exceeding \$50,000. This provision is much more complicated that it appears here. For additional details see the "General Explanation of the Tax Reform Act of 1969." Staff Report of the Joint Committee on Internal Revenue

Objectives\_\_\_\_\_

CFDA: 10.409, 10.416.

To facilitate improvement, protection, and proper use of farmland by providing adequate financing and supervisory assistance for soil conservation; water development, conservation, and use; forestawater development, conservation, and use, toresta-tion; drainage of farmland; the establishment and improvement of permanent pasture; and related measures. To increase the income of farm families and other rural residents. Funds are used to level and other fural residents. Futures are used to level land; carry out basic land treatment practices, including liming, fertilizing, and seeding; estab-lish permanent pastures and farm forests; estab-lish forestry practices; improve irrigation; develop water supplies for home use and livestock; purchase pumps, sprinkler systems, and other irrigation equipment; acquire water rights; restore and repair ponds and tanks, ditches, and canals for irrigation; dig ditches and install tile to drain farmland; develop ponds and water control structures for the production of fish under controlled conditions.

Financial form\_\_\_\_\_ Guaranteed/insured loans. Rural residents.

Direct recipient\_\_\_\_\_ Interest rate and Unavailable. maturity.

Subsidy costs\_\_\_\_\_ Information was not available to calculate the costs of this program independently of the other programs included under the title "Miscellaneous Farm Credit Programs" on table 3. The value of the loans made

or guaranteed under this program was:
Fiscal year 1970, \$4,732,940; fiscal year 1971,
\$8,614,497; fiscal year 1972, \$5,432,580; fiscal
year 1973, \$5,126,782; fiscal year 1974,
\$11,000,000; fiscal year 1975, \$21,000,000.

### RESOURCE CONSERVATION AND DEVELOPMENT LOANS

Farmers Home Administration, Department of Agri-Administering agency\_\_ culture.

Authorization: Food and Agriculture Act of 1962, Public Law 87-703; 1011 (supp. V) 1959-63 (7 U.S.C. 1010). Identification\_\_\_\_\_

Budget account: 05-75-4140-0-3-351. CFDA: 10.414.

Objectives\_\_\_\_\_ To provide loan assistance to local sponsoring agencies

in authorized areas where acceleration of program of resource conservation, development, and utilization will increase economic opportunities for local people. Loan funds may be used for (1) rural community public outdoor-oriented water-based recreational facilities; (2) soil and water, development, conservation, control and use facilities; (3) shift in land use facilities; (4) community water storage facilities; and (5) special purpose equipment to carry out the above purposes. Project must be located in an authorized RCD area. Total indebtedness for a

single RCD measure cannot exceed \$250,000.

Financial form\_\_\_\_\_ Guaranteed/insured loans. Direct recipient\_\_\_\_\_

Public agencies and local nonprofit corporations in authorized resource conservation and development areas may be eligible for loan assistance provided they: (1) are a sponsor of the RCD measure for which a loan is requested and which is included in the RCD project plan; (2) have authority to borrow funds, repay the loan, and pledge security for the loan and to operate the facilities or services provided; and (3) are financially sound and so organized and managed that it will be able to require organized and managed that it will be able to provide

efficient service.

Interest rate and maturity. Subsidy costs\_\_\_\_\_ Unavailable.

Information was not available to calculate the costs of this program independently of the other programs included under the title "Miscellaneous Farm Credit Programs" on table 3. The value of the loans made

Fiscal year 1970, \$1,500,000; fiscal year 1971, \$1,958,525; fiscal year 1972, \$982,000; fiscal year 1973, \$3,225,000; fiscal year 1974, \$3,600,000; fiscal year 1975, \$3,600,000.

#### WATERSHED PROTECTION AND FLOOD PREVENTION

Administering agency\_\_ Farmers Home Administration, Department of Agriculture.

Authorization: Watershed Protection and Flood Prevention Act of 1954, as amended, sec. 8 (16 Identification \_\_\_\_\_ U.S.C. 1006a).

Budget account: 05-75-4140-0-3-351.

CFDA: 10.419.

Objectives\_\_\_\_\_

To provide loan assistance for the local sponsors and share of cost for works of improvement in approved watersheds. Loan funds may be used to help local sponsors provide the local share of the cost of watershed works of improvement for flood prevention, irrigation, drainage, water quality management, sedimentation control, fish and wildlife development, public water-based recreation, and water storage and related costs. The total amount of WS loans outstanding in any one watershed cannot exceed \$5,000,000.

Financial form

Guaranteed/insured loans.

Direct recipient\_\_\_\_\_

Sponsoring local organization, such as municipal corporation, soil and water conservation district, or other organization not operated for profit of the approved watershed project who has authority under State law to obtain, give security for, and raise revenues to repay the loan and to operate and maintain the facilities to be financed with the loan. Unavailable.

Interest rate and maturity. Subsidy costs

Information was not available to calculate the costs of this program independently of the other pro-grams included under the title "Miscellaneous Farm Credit Programs" on table 3. The value of the loans made or guaranteed under this program

Fiscal year 1970, \$3,244,000; fiscal year 1971, \$6,985,744; fiscal year 1972, \$5,000,000; fiscal year 1973, \$19,964,000; fiscal year 1974, \$20,-400,000; fiscal year 1975, \$20,400,000.

### RECREATION FACILITIES LOANS

Administering agency\_\_

Farmers Home Administration, Department of Agriculture.

Identification\_\_\_\_\_

Authorization: Consolidated Farm and Rural Development Act, subtitle A, sec. 304; Public Law 92-419 (7 U.S.C. 1924).

Budget account: 05-75-4140-0-3-351.

CFDA: 10.413.

Objectives\_\_\_\_\_

To assist eligible farm and ranch owners or tenants, through the extension of credit and supervisory assistance, to convert all or a portion of the farms they own or operate to income-producing outdoor recreational enterprises which will supplement or supplant farm or ranch income.

Funds may be used to: (1) develop land and water resources, (2) repair and construct buildings, (3) purchase land, equipment, livestock, and related recreation items, and (4) pay necessary operating

expenses.

Recreation enterprises that may be financed include: campgrounds, horseback riding stables, swimming facilities, tennis courts, shooting preserves, vacation cottages, lodges and rooms for visitors, lakes and ponds for boating and fishing, docks, nature trails, hunting facilities, and winter sports areas. Guaranteed/insured loans.

Financial form\_\_\_\_\_ Direct recipient\_\_\_\_\_

Owners of rural property engaged in farming at the time the loan is made.

Interest rate and maturity.

Unavailable.

Subsidy cost\_\_\_\_\_ Information was not available to calculate the costs of this program independently of the other programs included under the title "Miscellaneous Farm Credit

Programs" on table 3. The value of the loans made

Fiscal year 1970, \$1,211,180; fiscal year 1971, \$1,090,160; fiscal year 1972, \$1,807,820; fiscal year 1973, \$1,500,000; fiscal year 1974, \$1,500,-000; fiscal year 1975, \$1,500,000.

### EMERGENCY LOANS

Home Administration, Administering agency\_\_ Farmers Department of Agriculture.

Identification\_\_\_\_\_ Authorization: Sections 321–327 of Public Law 87–128, as amended; (7 U.S.C. 1961-1967), and modified by

Public Law 91-606.

Budget account: 05-75-4140-0-3-351.

### COMMUNITY FACILITIES LOANS

Administering agency\_\_ Farmers Home Administration, Department of Agriculture.

Identification\_\_\_\_\_ Authorization: Consolidated Farm and Rural Development Act, section 306; Public Law 92-419; 7

U.S.C. 1926.

Budget account: 05-75-4155-0-3-352. CFDA: 10.423.

Objectives\_\_\_\_\_ To construct, enlarge, extend, or otherwise improve community facilities providing essential service to rural residents. Community facilities include but are not limited to those providing or supporting overall community development such as fire and rescue serv-

ices, transportation, traffic control, community, social, cultural, health and recreational benefits; industrial and business development.

Loans shall not be made for community electric or telephone systems. All facilities financed in whole or in part with FmHA funds shall be for public use.

Guaranteed/insured loans.

Public and quasi-public bodies and associations in-cluding corporations, Indian tribes and existing private corporations which (1) are operated on a notfor-profit basis, (2) have or will have the legal authority necessary for constructing, operating, and maintaining the proposed facility or service and for obtaining, giving security for, and repaying the loan, and (3) are unable to finance the proposed project from its own resources or through commercial credit at reasonable rates and terms.

Interest rate and maturity.1 Subsidy costs 1\_\_\_\_\_ Fiscal years 1970-75, 5 percent, 40 years.

Fiscal year 1970, \$0; fiscal year 1971, \$0; fiscal year 1972, \$0; fiscal year 1973, \$77,300,000; fiscal year 1974, \$192,430,000; fiscal year 1975, \$213,810,000.

### EMERGENCY LIVESTOCK FEED PROGRAM

Administering agency\_\_

Agricultural Stabilization and Conservation Service, Department of Agriculture and Bureau of Indian

Affairs, Department of the Interior.

Identification \_ \_ \_ \_ \_

Authorization: Agricultural Act of 1949, sections 407, 421, and clauses 1 and 2 of section 407, as amended; Commodity Credit Corporation Charter Act, as amended; Executive Order 11336; Public Law amended; Executive 82-299; 7 U.S.C. 1427.

Budget account: 05-66-4336-0-3-351.

CFDA: 10.061.

Objectives\_\_\_\_\_

To provide assistance to eligible livestock owners or needy Indian tribes through either sale or donations of Commodity Credit Corporation-owned feed grains.

Financial form

Direct recipient\_\_\_\_\_

Benefits-in-kind. Livestock owners who (1) do not have sufficient feed; (2) have suffered serious loss of feed; (3) require feed purchases larger than usual because of emergency;

and (4) would suffer undue financial hardship in obtaining sufficient feed through normal channels. Members of designated Indian tribes who are without sufficient means to purchase feed after allowances for necessary living expenses. Eligibility is determined by the Secretary of Agriculture. Need is usually brought about by severe drought, flood, hurricane, blizzard, or other uncontrollable catas-

trophes.

Subsidy costs\_\_\_\_\_

Fiscal year 1970, new program; fiscal year 1971, \$174,000; fiscal year 1972, \$1,119,000; fiscal year 1973, \$18,082,000; fiscal year 1974, \$8,860,000; fiscal year 1975, \$8,860,000.

### FERTILIZER DEVELOPMENT

Administering agency\_\_ Identification\_\_\_\_\_

Tennessee Valley Authority.

Authorization: Tennessee Valley Authority Act of 1933, as amended; 16 U.S.C. 831 et seq.; 48 Stat. 50.

Budget account: 33-15-4110-0-3-401.

CFDA: 62.001.

Objectives\_\_\_\_\_

To develop improved, cheaper fertilizer products and processes, especially in soil and water conservation programs, so as to improve the economic well-being of farmers.

Financial form\_\_\_\_\_

Benefits-in-kind.

Land-grant colleges, fertilizer industry firms, and Direct recipient\_\_\_\_\_ farmers may participate when fertilizers are available and suitable to the area and structure of organizational relationships. Fertilizer manufacturers and distributors may procure fertilizers for introductory programs. Patent licenses are available to fertilizer

industry. Agricultural research stations and extension services may take part on a cooperative contract basis.

Ultimate beneficiaries are the farmers of the United

States.

<sup>&</sup>lt;sup>1</sup> Includes the Water and Waste Disposal Systems program described under Natural Resources.

Formula requirements...

Subsidy costs

In cooperative contracts with land-grant colleges, institution's contribution depends on conditions contained in the specific contract.
Fiscal year 1970, \$6,816,358; fiscal year 1971, \$6,999,503; fiscal year 1972, \$7,166,445; fiscal year 1973, \$7,909,891; fiscal year 1974, \$8,262,000; fiscal year 1975, \$8,499,000.

# FOOD DISTRIBUTION

	FOOD DIDINIDOTION
Administering agency	Food and Nutrition Service, Department of Agriculture.
Identification	Authorization: Sec. 32 of Public Law 320, 74th Cong., as amended; 7 U.S.C. 612c; sec. 416 of the Agricultural Act of 1949, as amended; 7 U.S.C. 1431; secs. 6, 9, and 13 of the National School Lunch Act, as amended; 42 U.S.C. 1755, 1758, and 1761; sec. 8 of the Child Nutrition Act of 1966; Public Law 89-642; 42 U.S.C. 1777; Public Law 165, 75th Cong., as amended; 15 U.S.C. 713c; Public Law 92-32, 85 Stat. 85, 42 U.S.C. 1764; Public Law 92-433, 86 Stat. 729; Public Law 92-603, 86-1329; Public Law 93-29, 87 Stat. 56. Budget account: 05-66-4336-0-3-35, 05-81-5209-0-2-351. CFDA: 10.550.
Objectives	To improve the diets of school children and needy persons in households and charitable institutions and other individuals in need of food assistance, and to increase the market for domestically produced foods acquired under surplus removal or price support operations.
Financial form Direct recipient	Benefits-in-kind. Food is made available through the States for distribution to qualifying households, individuals, schools, charitable institutions, and summer camps. Families must live in city or county which has the program and must be certified by local welfare assistance as having inadequate income and resources. The family head may be employed, pensioned, striking, or unemployed. Upper limits of allowable income and resources vary with family size and among local jurisdictions. Only expectant or new mothers, infants, and young children from low-income families—those most subject to health problems caused by malnutrition—are eligible for individual assistance. All children in schools, service institutions, and summer camps which participate in the program may benefit from food donations.
Formula requirements	Not applicable to food donations. Formula grants allocated on basis of average per capita income and numbers of needy in program areas. No matching funds required, but States and localities are expected to bear cost of program administration (aside from the additional contribution made by the formula grants).
Subsidy_cost	Fiscal year 1970, \$558,376,000; fiscal year 1971, \$577,932,000; fiscal year 1972, \$605,928,563; fiscal year 1973, \$499,052,289; fiscal year 1974, \$515,-276,000; fiscal year 1975, \$301,169,000.
	FOOD STAMPS
Administering agency Identification	Food and Nutrition Service, Department of Agriculture.  Authorization: The Food Stamp Act of 1964; Public Law 88-525; 78 Stat. 703, 7 U.S.C. 2011-2025 (1964), as amended. Public Law 90-91; 81 Stat. 228; Public Law 90-552; 82 Stat. 958; Public Law 91-116; 83 Stat. 191; Public Law 91-671; 84 Stat. 2048; Public Law 92-603; 86 Stat. 1329; Public Law 93-86; 87 Stat. 247; Public Law 93-233; 87 Stat. 947.
	Budget account: 05-84-3505-0-1-703. CFDA: 10.551.

Objectives\_\_\_\_\_ This program improves the diets of low-income households and expands the market for domestically produced foods by supplementing the food purchasing power of eligible low-income families. Financial form Benefits-in-kind. Families buy stamps or "coupons" worth more than the purchase amount which varies according to income and family size. The coupons are used for food in retail stores. The coupons may be used to buy any food for human consumption, except for items labeled as imported. Almost all grocery stores in food stamp areas are authorized to accept the coupons. Direct recipient\_\_\_\_\_ Families may participate if they live in an area that has the program, are found by local welfare officials to be in need of food assistance, are receiving some form of welfare assistance, and are unemployed, part-time employed, working for low wages, or living on limited pensions. If families are not receiving welfare assistance, eligibility is based on family size and income, and their level of resources. Formula requirements\_\_ Federal Government pays 100 percent of the cost of bonus coupons. State and/or county pays approximately 37½ percent of administering cost for certifying non-public-assistance households, and for hearing officials and Outreach efforts, and 100 percent of the cost of issuing the coupons. Fiscal year 1970, \$551,000,000; fiscal year 1971, \$1,523,-055,857; fiscal year 1972, \$1,842,542,432; fiscal year 1973, \$2,207,532,000; fiscal year 1974, \$2,845,-698,000; fiscal year 1975, \$3,984,919,000. Subsidy cost-----SPECIAL FOOD SERVICE Administering agency... Food and Nutrition Service, Department of Agriculture. Identification\_\_\_\_\_ Authorization: National School Lunch Act. 28 amended; Public Law 90-302. Budget account: 05-84-3539-0-1-703. CFDA: 10.552. Objectives\_\_\_\_\_ This program provides commodities and cash grants to assist States to initiate, maintain, or expand nonprofit food service programs for children in service institutions, to improve the nutritional status of both preschool and school-age children. Federally appropriated special food service program for children funds are available to reimburse eligible institutions (day-care centers, settlement houses, recreation centers, and day camps) for food pur-chased for up to three complete meals and two supplemental meals daily. Financial help is also available to buy or rent necessary equipment. Financial form\_\_\_\_\_ Benefits-in-kind. Direct recipient.\_\_\_\_ Children who are in attendance at institutions participating in the program. Institutions participating are public and nonprofit private institutions such as day-care centers, settlement houses, and recreation centers that provide day care for children from low-income areas, or from areas with many working

mothers may apply, and also institutions providing

day care for handicapped children.

Formula requirements\_\_

Any funds made available by the State agency or the Food and Nutrition Service regional office, to service institutions for the purchase or rental of equipment shall be upon the condition that the institution shall bear at least one-fourth of the purchase or rental cost of equipment financed. Each State shall be apportioned not more than \$50,000, as a basic grant. In addition, from the funds remaining after the basic grants have been made, each State shall be apportioned an amount which bears the same ratio to such remaining funds as the number of children in that State aged 3 to 17, inclusive, in families with incomes of less than \$3,000 per annum bears to the total number of such children in all States.

Subsidy cost\_\_\_\_\_

Fiscal year 1970, \$7,258,000; fiscal year 1971, \$20,967,-000; fiscal year 1972, \$42,583,000; fiscal year 1973, \$54,097,833; fiscal year 1974, \$93,916,000; fiscal year 1975, \$109,600,000.

#### SCHOOL BREAKFASTS

Administering agency\_\_

Food and Nutrition Service, Department of Agriculture.

Identification\_\_\_\_\_

Authorization: Child Nutrition Act of 1966 as amended. Public Law 89-642, 80 Stat. 886, 42 U.S.C. 1773; Public Law 90–302, 82 Stat. 119, 42 U.S.C. 1773; Public Law 91–248, 84 Stat. 214, 42 U.S.C. 1773; Public Law 92–32, 85 Stat. 85, 42 U.S.C. 1773; Public Law 92–433, 86 Stat. 724. Budget Account: 05–84–3539–0–1–703.

CFDA: 10.553.

Objectives\_\_\_\_\_

To provide breakfasts to improve child nutrition.

Benefits-in-kind.

Financial form Direct recipient\_\_\_\_\_

Schools draw attendance from areas in which poor economic conditions exist and schools to which attending children must travel a long distance receive primary consideration and, if funds permit, other schools may participate. All children attending schools in which the breakfast program is operating may participate. Breakfast is served free or at a reduced price to children who are determined by local school authorities

to be unable to pay the full price. Children who are

Formula requirements...

able to pay the full price are expected to do so. The 50 States, District of Columbia, and Puerto Rico are initially given \$50,000 each as basic apportionment. Guam, Virgin Islands, American Samoa are given \$15,000 each. The total of these amounts (\$2,-645,000) is deducted from the total appropriation which is apportioned in the same manner as section 4 funds under the National School Lunch Program, but based on the number of breakfasts served in each State. Beginning in fiscal year 1974, funding will be on a performance basis and the apportionment formula will not be issued.

Subsidy cost\_\_\_\_\_

Fiscal year 1970, \$10,877,000; fiscal year 1971, \$20,-162,000; fiscal year 1972, \$26,541,000; fiscal year 1973, \$37,002,209; fiscal year 1974, \$70,119,000; fiscal year 1975, \$77,000,000.

# NONFOOD SERVICE ASSISTANCE

Administering agency Identification	Food and Nutrition Service, Department of Agriculture. Authorization: Child Nutrition Act of 1966 as amended, Public Law 89-642, 80 Stat. 887, 42 U.S.C. 1774; Public Law 91-248, 84 Stat. 208, 42 U.S.C. 1774; Public Law 92-433, 86 Stat. 727.
Objectives	Budget Account: 05-84-3539-0-1-703. CFDA: 10.554. This program provides States with grants-in-aid to supply schools in low-income areas with equipment for storing, preparing, transporting, and serving food to children.
Financial form Direct recipient	Benefits-in-kind. Schools receive cash assistance that is turned into benefit-in-kind food services going to school children under both the school lunch and school breakfast
Formula requirements	programs.  Fifty percent of the total funds available are apportioned based on the number of lunches served which met meal requirements for the preceding fiscal year as a percentage of the national total for such meals under section 4 of the National School Lunch Act. The remaining 50 percent of children in schools without a food service in all States. During any fiscal year, payments made by FNS to each State agency, and the payment made by FNS to the nonprofit private schools in any State, shall be upon the condition that at least one-fourth of the cost of all equipment financed under this part shall be borne from sources within the State. Funds from sources within the State shall include any source of State or local funds other than Federal grants and children's payments obtained by the school through any of its nonprofit food services.
Subsidy cost	Fiscal year 1970, \$16,715,000; fiscal year 1971, \$37,159,-000; fiscal year 1972, \$17,797,000; fiscal year 1973, \$16,032,058; fiscal year 1974, \$28,110,000; fiscal year 1975, \$22,000,000.
	SCHOOL LUNCH PROGRAM
Administering agency	Food and Nutrition Service, Department of Agriculture.
Identification	Authorization: National School Lunch Act of 1946, as amended. Public Law 79-396, 60 Stat. 230, 42 U.S.C. 1751; Public Law 87-823, 76 Stat. 944, 42 U.S.C. 1752; Public Law 91-248, 84 Stat. 208, 42 U.S.C. 1752; Public Law 92-153, 85 Stat. 419, 420, 42 U.S.C. 1753; Public Law 92-433, 86 Stat. 726. Budget Account: 05-84-3539-0-1-703.
Objectives	CFDA: 10.555. This program provides commodity and cash grants to
Objectives	State educational agencies to assist them in helping schools provide adequate school lunches. This helps to safeguard the health and well-being of children and to encourage the domestic consumption of nutritious agricultural commodities.
Financial formDirect recipient	Benefits-in-kind.  Children of high school age and under who are in attendance at schools participating in the program. Schools desiring to participate must agree to operate a nonprofit lunch program which is available to all children regardless of race, color, creed, or national origin. Lunches must be served free or at a reduced price to children who are determined by local school authorities to be unable to pay the full price for their lunches.

Formula requirements\_\_

Federal funds made available for general cash for food assistance in accordance with section 4 of the act on a performance basis at a rate of not less than 10 cents per meal for all meals served under the program. Federal funds are made available for special cash assistance in accordance with section 11 of the act on a performance basis at a rate of not less than 45 cents per free meal and not less than 35 cents per cents per free meal and not less than 35 cents per reduced price meal. Section 4 must be matched by \$3 of funds from within the State for each \$1 of Federal funds except that States having an average per capita income of less than the national average per capita income are allowed to match Federal funds at a lesser rate. Funds from within the State may include funds derived from State and local tax revenues which are used for food service programs and funds received from children for lunch payments. For the fiscal year beginning July 1, 1973, and for the succeeding fiscal year, State revenue (other than revenues derived from the program) appro-priated or specifically reserved and used for program purposes (other than salaries and administrative expenses at the State as distinguished from the local level), shall constitute at least 6 percent of the matching requirement for the preceding fiscal year. This State revenue matching percentage will be raised to 8 percent and then to 10 percent at 2 year intervals.

Subsidy cost\_\_\_\_\_

Fiscal year 1970, \$300,793,000; fiscal year 1971, \$599,313,000; fiscal year 1972, \$817,948,000; fiscal year 1973, \$938,922,116; fiscal year 1974, \$1,157,-851,000; fiscal year 1975, \$1,212,325,000.

Food and Nutrition Service, Department of Agriculture.

Identification \_\_\_\_\_

Authorization: Child Nutrition Act of 1966, as amended, Public Law 91-295; 84 Stat, 336; 42 U.S.C. 1772. Budget account: 05-84-3502-0-1-703.

CFDA: 10.556.

Objectives\_\_\_\_\_

This program provides assistance in the form of reimbursement payments to encourage consumption of fluid whole milk by children in public and nonprofit private schools of high school grade and under, nonprofit nursery schools, child care centers, settlement houses, summer camps, and similar nonprofit institutions that provide for the care and training of children.

Financial form

Benefits-in-kind.

All children attending schools and institutions in which Direct recipient\_\_\_\_\_ the special milk program is an operation may par-ticipate in the program. All public and nonprofit private schools of high school grade and under are

eligible to participate. Also nonprofit child care institutions such as nursery schools, child care centers, settlement houses, and summer camps are eligible

for assistance under this program.

Formula requirements\_

The funds apportioned to each State are based on the amount of money each State spent the previous year. The percent of the prior years' total expenditures in relation to the amount currently available for apportionment is applied to each State's expenditure for the prior year. There are no matching provisions, but the cost of milk in excess of the Federal reimbursement must be borne by sources within the States.

Subsidy cost...... Fiscal year 1970, \$101,527,000; fiscal year 1971, \$92,640,000; fiscal year 1972, \$95,027,000; fiscal year 1973, \$94,767,255; fiscal year 1974, \$98,360,000; fiscal year 1975, \$119,170,000.

#### EMERGENCY FOOD AND MEDICAL SERVICES

Administering agency Office of Economic Opportunity.

Authorization: The Economic Opportunity Act of 1964, as amended by Public Law 91-177, Section 105; 42 U.S.C. 2809. Public Law 88-452.

Budget account: 04-37-0500-0-1-999.

CFDA: 49.005.

To organize comprehensive efforts, in local communities, to provide adequate nutrition for all poor persons. Project grants may be used for: developing new food assistance programs; expanding existing programs, providing transportation to centers, providing medical services to those suffering malnutrition, and so on.

Benefits-in-kind.

Individuals of families who are eligible to receive

Direct recipient Individuals of families who are eligible to receive services from other local OEO supported programs. Subsidy costs Fiscal year 1970, \$0; fiscal year 1971, \$48,600,000; fiscal year 1972, program ended.

# SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS,

AND CHILDREN

Administering agency

Identification

Identifica

Budget account: 05-81-5209-0-2-351. CFDA: 10.557.

Objective\_\_\_\_\_\_ To supply nutritious foods to participants identified to be nutritional risks. Another major objective is to correct and evaluate data which will medically identify benefits of this food intervention program. Data will also be collected and analyzed to measure the administrative efficiencies of various methods of

making food available to participants.

Financial form\_\_\_\_\_\_\_Benefits-in-kind.

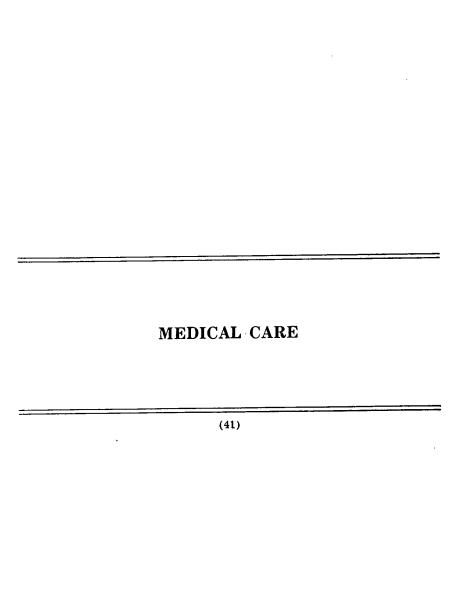

Direct recipient\_\_\_\_\_\_Benefits-in-kind.

Pregnant or lactating women, infants, and children shall be eligible if: (a) they reside in an approved project area; (b) they are eligible for treatment at less than the customary full charge for such services by the local agency; and (c) they are determined by a competent professional on the staff of the local

agency to need supplemental foods.

Grants are allocated on the basis of number of participants, food costs, administrative and clinic budgets for each applicant, and State administrative costs involved. No matching funds are required, but States and local agencies are expected to bear the administrative costs in excess of 10 percent of

Subsidy cost\_\_\_\_\_ the total grant.

#### DEDUCTIBILITY OF MEDICAL EXPENSE

Section 213—medical, dental, and so forth, expenses. Tax subsidies. Authorization\_\_\_\_\_

Financial form.... Description\_\_\_\_\_

Medical expenses in excess of 3 percent of adjusted regions income and expenditures for prescribed drugs and medicines in excess of 1 percent of adjusted gross income may be deducted by individuals as itemized nonbusiness deductions. Individuals may also deduct half of the premiums paid for medical-care in the premium and deductions. surance up to a maximum deduction of \$150 per year, without regard to the 3-percent limitations. The deduction beyond 3 percent of medical costs incurred may in large part be a welfare payment designed to protect taxpayers against prohibitively expensive illnesses: the provision has often been defended on these grounds. But others argue that this reduces the overall insurance costs necessary for individuals to protect themselves against such risks. Moreover, the right of individuals to deduct a portion of the costs of insurance premiums is a clear subsidy.

Fiscal year 1970, \$1,700,000,000; fiscal year 1971, \$1,700,000,000; fiscal year 1972, \$1,900,000,000; fiscal year 1973, \$1,900,000,000; fiscal year 1974, \$2,100,000,000; fiscal year 1975, \$2,300,000,000. Subsidy costs....

	Budget account: 09-35-0712-0-1-651. CFDA: 13.369.
Objectives	To increase the number of nurses and improve the quality of nursing education by providing guarantees of up to 90 percent of non-Federal construction loans to nonprivate nursing schools.
Financial form	Guaranteed/Insured Loans
Direct recipient	Accredited nonprofit, private nursing schools which provide either a collegiate, associate degree, or diploma program.
Interest rate and maturity.	Fiscal years 1970-72, 6.38 percent, 20 years; fiscal years 1973-75, 2.5 percent, 50 years.
Subsidy costs	Fiscal year 1970, \$1,250,000; fiscal year 1971, \$1,300,-000; fiscal year 1972, \$2,650,000; fiscal year 1973, \$29,320,000; fiscal year 1794, \$32,070,000; fiscal year 1975, \$26,090,000.

#### MEDICAL ASSISTANCE PROGRAM (MEDICAID)

Administering agency	Social and Rehabilitation Service, Department of Health, Education, and Welfare.
Identification	Authorization: Title XIX, Social Security Act as amended; Public Law 89-97; Public Law 90-248; Public Law 91-56; 42 U.S.C. 1396, et seq. Public Law 92-223; Public Law 92-603.  Budget account: 09-50-0581-0-1-652.  CFDA: 13.714.
Objectives	To provide financial assistance to States for payments of medical assistance on behalf of cash assistance recipients and, in certain States, on behalf of other medically needy, who, except for income and re- sources, are categorically eligible.
Financial form	Benefits-in-kind.
Direct recipient	Any needy individual may apply to a State or local welfare agency for medical assistance. Eligibility is determined by the State in accordance with Federal regulations.
Formula grants	Federal funds are available to match State expenditures for medical care provided under the State plan; the Federal share ranges from 50 percent to 83 percent according to a formula based upon the relation of State per capita income to national per capita income.
Subsidy costs	Fiscal year 1970, \$2,637,968,149; fiscal year 1971, \$3,373,866,000; fiscal year 1972, \$4,366,602,000; fiscal year 1973, \$4,997,686,000; fiscal year 1974, \$5,659,089,000; fiscal year 1975, \$6,592,134,000.
HEAL	TH INSURANCE FOR THE AGED

#### HEALTH INSURANCE FOR THE AGED

#### Supplementary Medical Insurance (Medicare)

Administering agency	Social Security Administration, Department of Health, Education, and Welfare.
Identification	Authorization: Social Security Amendments of 1965, title XVIII, pt. B; Public Law 89–97 as amended by Public Law 90–248; 42 U.S.C. 1395 et seq.
	Budget account: 09-60-8004-0-7-652. CFDA: 13.801.
Objectives	Provides protection against the costs of health care to persons 65 or over who elect this coverage. The medical services covered in this program are broader than those covered in the medicare program (CFDA)
	13.800), and do not necessarily require the patient to be hospitalized.
Financial form	Benefits-in-kind. The regular medicare insurance is provided without charge and funded through a self-financing trust fund. In the supplemental program an enrollee pays a monthly premium of \$5.30 (increased)
	to \$5.60 effective July 1971) and the aggregate of these premiums is matched by appropriations from Federal funds.
Direct recipient	Nearly everyone 65 or over can apply for medical coverage (during specified enrollment periods). This program, like medicare, provides medical insurance to the aged. It is, however, supplemental to the regular

the aged. It is, however, supplemental to the regular medical care program in that the insurance coverage it provides is broader and more extensive.

Fiscal year 1970, \$1,979,000,000; fiscal year 1971, \$2,034,939,000; fiscal year 1972, \$2,254,820,000; fiscal year 1973, \$2,391,128,000; fiscal year 1974, \$2,966,000,000; fiscal year 1975, \$3,586,000,000. Subsidy costs

#### EXCLUSION OF MILITARY BENEFITS AND ALLOWANCES

Sec. 112—Certain combat pay of members of the Armed Forces. Sec. 113—Mustering-out payments for members of the Armed Forces. Sec. 119—Meals Authorization. or lodging furnished for convenience of the employer. Financial form Tax subsidies. Description....

The supplements to salaries of military personnel by provision of quarters and meals on military bases and off-base quarters allowances for military families are excluded from taxation. In addition, an exclusion from gross income for members of the Armed Forces serving in combat zones or hospitalized as the result of wounds, disease, or injury incurred while serving in such a zone (this is presently limited to personnel whose service in a combat zone was between June 24, 1940, and Jan. 1, 1955). For enlisted personnel, this exclusion is granted for all pay received for service in the combat zone or while hospitalized; for commissioned officers, the exclusion is limited to the first \$200 of pay received each month. Because the size of this tax benefit is deter-

minorth. Because the size of this tax benefit is determined by the taxpayer's marginal rate, the largest subsidies go to the higher paid military personnel. Fiscal year 1970, \$50,000,000; fiscal year 1971, \$500,000,000; fiscal year 1972, \$650,000,000; fiscal year 1973, \$700,000,000; fiscal year 1974, \$700,-000,000; fiscal year 1975, \$700,000,000. ## WORK STUDY PROGRAMS

	., 01011 01011 1110 011111110
Administering agency Identification	Office of Education, Department of Health, Education, and Welfare.  Authorization: Higher Education Act of 1965; title LV,
	part C, Public Law 89-329; 42 U.S.C. 2751-27562a; Vocational Education Amendments of 1968, title I, part H; Public Law 90-576; 20 U.S.C. 1241-1391; 82 Stat. 1064-1091 and Education Amendments of 1972; Public Law 92-318, title II—Vocational Education, Sec. 207, 20 U.S.C. 1371; 86 Stat. 326. Budget account: 09-40-0273-0-1-603; 09-40-0293-0-
	1-602.
Objectives	CFDA: 13.463 and 13.501.  To promote the part-time employment of students, particularly those with great financial need, who require assistance to pursue courses of study at institutions of higher education.  To assist economically disadvantaged full-time vocational education students, age 15-20, to remain in school by providing part-time employment with public employers.
Financial form Direct recipients	Direct payments. Undergraduate, graduate, or professional students enrolled (or accepted for enrollment) on at least a half-time basis, whose resources, including parental contributions, are determined (by the grantee institution) to be inadequate to enable them to study at the institution.
Formula requirements	The Federal share of the compensation paid to students normally does not exceed 80 percent. The remaining share must be paid from any nongrant source. From the sums available the Commissioner shall allot to each State an amount which bears the same ratio to such sums for such year as the population 15–20, inclusive, of the State, in the preceding fiscal year bears to the population 15–20, inclusive, of all the States in such preceding year. Federal funds may be used for 80 percent expended for compensation of students and an amount, not to exceed 1 percent of the allotment, of \$10,000, whichever is greater, may be expended for the development and administration of the plan
Subsidy costs	Fiscal year 1970, \$158,900,000; fiscal year 1971; \$205,199,281; fiscal year 1972, \$243,400,000; fiscal year 1973, \$280,724,000; fiscal year 1974, \$278,-049,000; fiscal year 1975, \$250,000,000.
	VETERANS' EDUCATION
Administering agency	Department of Veterans' Benefits, Veterans' Administration.  Office of Education, Department of Health, Education,
Identification	and Welfare.  Authorization: 30 U.S.C. 1661, Higher Education Act of 1965 as amended by Public Law 92-318, title X, section 420.  Budget account: 29-00-0137-0-1-802; 09-40-0293- 0-1-602.
Objectives	CFDA: 64.111 and 13.540.  To make service in the Armed Forces more attractive by extending benefits of a higher education to qualified young persons who might not otherwise be able to afford such an education; and to restore lost educational opportunities to those whose education was interrupted by active duty after January 31, 1955.  To encourage colleges and universities to serve the special needs of Vietnam-era veterans.

Financial form Direct payments.

Direct recipient\_\_\_\_\_ The veteran must have served honorably on active duty for more than 180 days, part of which occurred after January 31, 1955, or who was discharged after such date because of a service-connected disability. A serviceman who has served on active duty for more than 180 days and who continues on active assistance is also eligible. Upon completion of 18 months of active duty, the maximum of 36 months of educational assistance will be granted, if the veteran is released under condition that satisfy

month of service.

his active duty obligation, otherwise assistance will be provided for at the rate of 1½ months for each

Subsidy costs\_\_\_\_\_

month of service.

Veterans enrolled in eligible institutions of higher education, who are recipients of benefits under Chapters 31 and 34 of title 38, U.S.C.

Fiscal year 1970, \$938,775,099; fiscal year 1971, \$1,521,700,000; fiscal year 1972, \$1,812,434,000; fiscal year 1973, \$2,538,214,848; fiscal year 1974, \$3,053,496,000; fiscal year 1975, \$2,656,526,000.

#### MISCELLANEOUS EDUCATION AND TRAINING FELLOWSHIPS

Administering agency\_\_ Almost all executive agencies.

Identification \_\_\_\_\_ Authorization: Higher Education Act of 1965, National Defense Education Act of 1958, Education Professions Development Act, Education of the Handicapped Act, National Science Foundation Act of 1950, National Sea Grant College and Program Act

of 1966, Radiation Control for Health and Safety Act of 1968, Atomic Energy Act of 1954, Water Quality Act of 1965 and 1970. Omnibus Crime Control and Safe Streets Act of 1968, and others.

Control and Safe Streets Act of 1908, and others. Budget account: Various.

CFDA: 13.426, 13.468, 47.009, 19.101, 13.407, 13.402, 13.441, 13.451, 66.201, 24.020, 66.002, 13.416, 13.425, 13.434, 13.461, 13.506, 13.508, 13.509, 13.514, 13.740, 16.504,66.410, 24.017, 13.510, 11.417, 11.418, 13.421, 13.490, 13.473, 13.489, 47.032, 47.019, 47.034, 13.417.

To promote educational training generally within the higher education system. Some of these programs are

Objectives\_\_\_\_\_

higher education system. Some of these programs are aid to general educational training, others are quite specific training such as radiation specialists or nuclear engineers. They all have in common that the training occurs within the context of the higher education system and that they are specifically for training. A large amount of training, particularly of graduate students, is funded through research grants. This has been excluded here because of the difficulty in separating a payment to train for research from a payment to purchase research

services. Direct cash payments (benefits-in-kind).

Financial form Direct recipient\_\_\_\_\_ Varies with individual program, In some cases grants

are made directly to the student, in others the money is given to the institution which then disburses it in the form of cash payment, lower tuition, educational

supplies, etc.

Fiscal year 1970, \$353,878,473; fiscal year 1971, \$321,226,747; fiscal year 1972, \$235,832,874; fiscal year 1973, \$243,847,000; fiscal year 1974, \$234,123,000; fiscal year 1975, \$204,706,000. Subsidy costs\_\_\_\_\_

# HIGHER EDUCATION-LAND-GRANT COLLEGES AND UNIVERSITIES (Land-Grant College Endowment)

Administering agency\_\_ Office of Education, Department of Health, Education. and Welfare.

Authorization: Morrill Act of 1862, as amended; 12 Stat. 503; 7 U.S.C. 301; Second Morrill Act of 1890, as amended; 26 Stat. 417; 7 U.S.C. 322 and 323; Bankhead-Jones Act, as amended; 49 Stat. 439; Public Law 182; 7 U.S.C. 329. Identification\_\_\_\_\_

Budget account: 09-40-0293-0-1-602.

CFDA: 13.453.

Grants to land-grant colleges and universities to support instruction in agriculture, mechanic arts, Objectives\_\_\_\_\_ English, mathematics, science, economics, and specialized teacher training in agriculture, mechanic

arts, and home economics. Financial form Direct payments.

Direct recipient\_\_\_\_\_ Formula requirements...

Lirect payments.

Land-grant colleges designated by State legislatures.

Each State (including the District of Columbia, Guam,
Virgin Islands, and Puerto Rico) receives \$50,000
under Second Morrill Act. The present (1974)
Bankhead-Jones appropriation is \$9,500,000, of
which \$7,800,000 is equally divided among the
States, and \$1,700,000 is proportioned on the basis
of population. In fiscal year 1973, Guam and the
Virgin Islands were given land-grant status, and
each received a one-time endowment of \$3,000,000 each received a one-time endowment of \$3,000,000

in lieu of land.

Fiscal year 1970, \$14,720,000; fiscal year 1971, \$12,680,000; fiscal year 1972, \$12,600,000; fiscal year 1973, \$18,700,000; fiscal year 1974, \$12,200,000; Subsidy costs\_\_\_\_\_ fiscal year 1975, presently not available.

# ADDITIONAL PERSONAL EXEMPTION FOR STUDENTS

Section 151—Allowance of deductions for personal exemptions (e)(1)(B)(ii) refers to "student." Authorization Financial form..... Tax subsidies.

Description\_\_\_\_\_

Taxpayers may claim personal exemptions for de-pendent children over 18 who receive \$600 or more of income per year only if they are full-time students. The student may also claim an exemption on his own tax return, in effect providing a double exemption, one of the parents' tax return and one on the student's. Foster children were added to the definition of dependents by the Tax Reform Act of 1969 thus allowing the provision referred to above to apply to foster children when the condition of being a student is satisfied.

Fiscal year 1970, \$525,000,000; fiscal year 1971, \$500,000,000; fiscal year 1972, \$550,000,000; fiscal year 1973, \$640,000,000; fiscal year 1974, \$675,000, Subsidy costs\_\_\_\_\_

000; fiscal year 1975, \$710,000,000.

### DEDUCTIBILITY OF CONTRIBUTIONS TO EDUCATIONAL INSTITUTIONS

Authorization \_\_\_\_\_ Section 170-Charitable, etc. Contributions and gifts. Financial form Tax subsidies.

Contributions to nonprofit educational institutions are Description\_\_\_\_\_ allowed as an itemized nonbusiness deduction for individuals. The deduction is generally limited to 30 percent of the adjusted gross income for contributions to organizations, including educational institutions, supported by the general public. The exemption from taxation of money or property the devoted to charitable and other purposes is based upon the theory that the Government is compensated for the loss of revenue by its relief from financial burden which would otherwise have to be met by appropriations from public funds, and by the benefits resulting from the promotion of the general welfare. The United States derives no such benefit from gifts to foreign institutions, and the proposed limitation is consistent with the above theory. If the recipient, however, is a domestic organization the fact that some portion of its funds is used in other countries for charitable and other purposes (such as missionary and educational purposes) will not affect the deductibility of the gift. (Sec. 23(q) of the Revenue Code of 1939) Fiscal year 1970, \$200,000,000; fiscal year 1971, \$200,000,000; fiscal year 1972, \$275,000,000; fiscal year 1970, \$200,000,000; fiscal year 1970, \$200,000,000; fiscal year 1970, \$200,000,000; fiscal year 1970, \$200,000,000; fiscal year 1971, \$200,000,000 Subsidy costs\_\_\_\_\_ year 1973, \$275,000,000, fiscal year 1974, \$300,000,-000, fiscal year 1975, \$330,000,000. ### EXPORT PAYMENTS ON AGRICULTURAL PRODUCTS

Administering agency	Consumer and Marketing Service, Department of Agriculture.
Identification	Authorization: Agricultural Adjustment Act of 1935, as amended; sec. 32; Public Law 74–320; 7 U.S.C. 612c.
	Budget account: 05-32-5209-0-2-351. CFDA: 10.152.
Objectives	To enable agricultural producers to retain a fair share of export markets. The subsidies are used for pay- ment on an amount needed to make the product competitive on the foreign market.
Financial form	Direct payments.
Direct recipient	Representative agricultural groups may request assistance when they encounter a loss of export markets. Agricultural exporters of the designated products who participate in the program receive the subsidy.
Subsidy costs	Fiscal year 1970, \$5,336,000; fiscal year 1971, \$3,928,708; fiscal year 1972, end of program.

# WESTERN HEMISPHERE TRADE CORPORATION Authorization ........ Sec. 921—Definition of Western Hemisphere trade cor-

	porations. Sec. 922—Special deductions.
Financial form	Tax subsidies.
Description	
	activities (other than incidental purchases) in the
	Western Hemisphere, deriving at least 95 percent'of
	gross income from sources outside of the United
	States and at least 90 percent from the active conduct
	of a trade or a business qualify as Western Hemis-
	phere trade corporation and are entitled to a special
	deduction. The effect of this deduction is to reduce the
	eligible corporation's tax rate by 14 percentage points.

Description—Con....

It has been suggested that the objective of this program is to provide relief to domestic corporations trading within the Western Hemisphere which are at a considerable competitive disadvantage with foreign corporations under other tax rates which they must face. It is also argued that this provision has the favorable balance-of-payments effects of increasing U.S. exports more than would similar capital investment in developed countries.

Subsidy cost\_\_\_\_\_

Fiscal year 1970, \$55,000,000; fiscal year 1971, \$50,-000,000; fiscal year 1972, \$75,000,000; fiscal year 1973, \$50,000,000; fiscal year 1974, \$75,000,000; fiscal year 1975, \$100,000,000.

# EXCLUSION OF GROSS-UP ON DIVIDENDS OF LESS DEVELOPED COUNTRY CORPORATIONS

Authorization\_\_\_\_\_

Sec. 902—Credit for corporate stockholders in foreign corporation. Sec. 78—Dividends received from certain foreign corporations by domestic corporations choosing foreign tax credit.

Financial form

Tax subsidies.

Description\_\_\_\_\_

Income of foreign branches and subsidiaries of U.S. corporations is subject to taxation abroad. Domestic corporations receiving dividends from foreign subsidiaries may take a credit for foreign income taxes levied on the profits of the foreign subsidiary out of which the dividends were paid. But if the dividends are from an industrialized country, the domestic corporation must "gross up" the dividends in its taxable income. This means their tax base is income before deductions of foreign income taxes. On the other hand if dividends are received from a less-developed country, this is not required. Thus, the parent domestic company secures the benefit both of a deduction of foreign income taxes and a credit for foreign income taxes.

One possible purpose of this subsidy is indicated in the committee reports for the Revenue Act of 1962 where it states, "The location of investments in such contries is an important factor in stimulating American

exports to the same areas."

Fiscal year 1970, \$55,000,000; fiscal year 1971, \$55,000,-000; fiscal year 1972, \$55,000,000; fiscal year 1973, \$60,000,000; fiscal year 1974, \$70,000,000; fiscal year 1975, \$80,000,000.

### DEFERRAL OF FOREIGN SUBSIDIARY INCOME

Authorization....

Subpart F—Controlled foreign corporations. Sec. 951—Amounts included in gross income of U.S. shareholders. Sec. 952—Subpart F income defined. Tax subsidies.

Financial form\_\_\_\_\_ Description\_\_\_\_\_

U.S. corporations are not required currently to file consolidated returns which include the unrepatriated earnings of controlled foreign subsidiaries.

The President in his 1961 message questioned the desirability of providing "tax deferral" with respect to earnings of U.S. controlled companies (except in the case of investments in less developed countries). He recommended elimination of the tax-haven device anywhere in the world, even in the underdeveloped countries, through the elimination of the tax-deferral privilege for those forms of activities, such as trading, licensing, insurance, and others, that typically seek out tax-haven methods of operation.

The 1962 bill "does not eliminate tax deferral in the Description-Con---case of operating businesses owned by Americans which are located in the economically developed countries of the world. \* \* \* the location of investments in these countries is an important factor in stimulating American exports. \* \* \* Moreover \* \* \* to impose the U.S. tax currently on the U.S. shareholders of American-owned businesses operating abroad would place such firms at a disadvantage with other firms located in the same areas not subject to U.S. tax." (Paraphrase of House report, Revenue Act of 1962.)

Fiscal year 1970, \$170,000,000; fiscal year 1971, \$165,000,000; fiscal year 1972, \$165,000,000; fiscal year 1971, \$165,000,000 Subsidy costs year 1973, \$325,000,000; fiscal year 1974, \$350,000,-000; fiscal year 1975, \$375,000,000.

# EXCLUSION OF EARNED INCOME IN U.S. POSSESSIONS

Sec. 931-Income from sources within possessions of Authorization\_\_\_\_\_ the United States. Sec. 932—Income from sources within Puerto Rico. Sec. 934—Limitation on reduction in income tax liability incurred to the Virgin

Tax subsidies. Financial form\_\_\_\_\_ Description....

Under present law, U.S. citizens or domestic corporations earning income in possession of United States generally are taxable only on their U.S. source income (plus amounts received in the United States) if they meet certain requirements. In general, these requirements are that the citizen or corporation derive 80 percent of its gross income from sources within such a possession and 50 percent of its gross income from the active conduct of a trade or business within such a possession (both of these tests being applied with respect to income received in the prior 3

years).
A U.S. citizen or domestic corporation which qualifies for this treatment may exclude from its U.S. tax base gross income from sources outside the United States in the same way as nonresident aliens and foreign corporations not engaged in trade or business

within the United States.

### DOMESTIC INTERNATIONAL SALES CORP.

Authorization\_\_\_\_\_ 26 U.S.C. pt. IV, 991 et seq.

Financial form\_\_\_\_\_ Tax subsidies.

Description\_\_\_\_\_ DISC is a special provision designed to encourage U.S. exports. Companies set up special "paper corporations through which they funnel their export activities and thereby receive tax deferral for 50 per-

cent of their export income.

To qualify as a DISC, at least 95 percent of a corporation's gross receipts must arise from export sale or lease transactions and other export-related investments or activities. In addition, at least 95 percent of the corporation's assets must be export related. Included in export-related assets are "producer's loans" which are loans (subject to certain restrictions) made to the U.S. parent producer (or any other U.S. exporter) to the extent of the producer's assets used for export business. These loans by a DISC do not give rise to taxation of the DISC or the parent on the amounts loaned.

Generally, present law requires sales between a parent corporation and its subsidiary to be made on an arm's length basis; that is, at the price the parent company would have charged an unrelated third party. Special pricing rules in the act permit a DISC to earn a larger relative amount of the profits arising on sales by the DISC of its parent company's

expert products.

Fiscal year 1970-72, \$0; fiscal year 1973, \$250,-000,000; fiscal year 1974, \$490,000,000; fiscal year Subsidy costs.... 1975, \$920,000,000.

# DEDUCTIBILITY OF INTEREST ON OWNER-OCCUPIED HOMES

Authorization \_\_\_\_\_ Financial form\_\_\_\_\_ Sec. 163 of Internal Revenue Code.

Tax subsidies.

Description\_\_\_\_\_

Owner occupants of homes may deduct mortgage interest as itemized nonbusiness deductions. This provision dates back to the Revenue Act of 1918, when the deductibility of interest payments for conventional business expenses was expanded.

It is now also widely held that this tax provision provides encouragement to homeownership, which it is argued is beneficial to both the community and the

individual.

The present law allows the deduction of interest paid, except on indebtedness incurred for the purchase of tax-free obligations or securities. This is difficult of administration, for in many cases it is impossible to tell for what purpose indebtedness is incurred. A man, for example, may have a mortgage on his house and have \$1,000 in the bank. He borrows \$1,000 and buys a Liberty bond and makes a payment on his mortgage. For what purpose was the \$1,000 borrowed? The proposed bill allows the deduction of all interest paid in excess of the amount of interest received free from income tax. This is easy of administration and carries out the general purpose of the existing law. (Quote from House report on the Revenue Act of 1918.)

Subsidy costs

Fiscal year 1970, \$2,600,000,000; fiscal year 1971, \$2,800,000,000; fiscal year 1972, \$2,400,000,000; fiscal year 1973, \$3,500,000,000; fiscal year 1974, \$4,000,000,000; fiscal year 1975, \$4,500,000,000.

### DEDUCTIBILITY OF PROPERTY TAXES ON OWNER-OCCUPIED HOMES

 $\mathbf{Authorization}_{----}$ 

Section 164 of Internal Revenue Code.

Financial form\_\_\_\_\_

Tax subsidies.

This provision of the tax code was a part of the original 1913 Revenue Act. The act stated that: "Third, all National, State, county, school, and municipal taxes paid within the year, not including those assessed against local benefits." It appears that Description\_\_\_\_\_ taxes were excluded as the result of legislators attempting to find an appropriate definition of net

income. It is now also widely held that this tax provision provides encouragement to homeownership, which it is argued is beneficial to both the community and

the individual.

Subsidy costs\_\_\_\_\_

Fiscal year 1970, \$2,800,000,000; fiscal year 1971, \$2,900,000,000; fiscal year 1972, \$2,700,000,000; fiscal year 1973, \$3,250,000,000; fiscal year 1974, \$3,500,000,000; fiscal year 1975, \$3,800,000,000.

Sec. 167(f)—Depreciation. Authorization\_\_\_\_\_

Tax subsidies. Financial form\_\_\_\_\_

The owners of rental housing may claim in early years Description\_\_\_\_\_

depreciation in excess of straight-line depreciation. The 1969 Tax Reform Act limited the depreciation allowance to 125 percent, declining balance depreciation for used residential property. Five-year amortization for the rehabilitation of low-income rental housing was also provided for.

Fiscal year 1970, \$275,000,000; fiscal year 1971, \$255,000,000; fiscal year 1972, \$500,000,000; fiscal year 1974, figures unavailable, fiscal year 1975, \$600,000,000. Subsidy costs\_\_\_\_\_

### REHABILITATION OF LOW-INCOME HOUSING

Sec. 167(k) of Internal Revenue Code. Authorization\_\_\_\_\_

Financial form\_\_\_\_\_ Tax subsidies. Description\_\_\_\_\_

To encourage rehabilitation of buildings for low- and moderate-income rental housing, the act allows taxpayers to elect to compute depreciation on rehabilitation expenditures which are made after July 24, 1969, under the straight-line method over a period of 60 months, if the additions or improvements have a useful life of 5 years or more. This rapid depreciation is limited to expenditures made prior to January 1, 1975, in order to provide an opportunity for the Congress to evaluate the effectiveness and cost of the new incentive. It is available only for low-income rental housing where the dwelling units are held for occupancy for families or individuals of low or moderate income, consistent with the policies of the Housing and Urban Development Act of 1968. The 60-month rule does not apply to hotels, motels, inns, or other establishments, where more than one-half of the units are used on a transient basis.

To qualify for the 60-month depreciation, the aggregate rehabilitation expenditures as to any housing may not exceed \$15,000 per dwelling unit, and the sum of the rehabilitation expenditures for 2 consecutive taxables years-including the taxable year-must

exceed \$3,000 per rental unit.

(Quote from the staff report of the Joint Committee on Internal Revenue Taxation, p. 182.)

### EXCLUSION OF IMPUTED NET RENT

Section 61 of the Internal Revenue Code is where Authorization\_\_\_\_\_ income is defined so as to exclude imputed net rent.

Tax subsidies. Financial form Description\_\_\_\_\_

The tax system discriminates in favor of those who own homes by making their tax liability less than those who rent. Those who rent pay taxes on all their income, including that portion of their income spent on rent. Those who own their homes receive part of their income in kind, by living in their home, but this income is not reflected in any market transaction, and, therefore, it escapes the income tax system. If the homeowner were to rent his home, or use the equity in his home to purchase other securities, he would have to pay taxes on the income generated. Homeownership makes it possible to avoid such taxes because the income tax system has been defined so as to exclude the in-kind income generated from the asset of an owner-occupied home.

Again, it is widely held that this aspect of the tax law

encourages homeownership.

### RURAL ENVIRONMENTAL PROGRAM

Administering agency\_\_

Agricultural Stabilization and Conservation Service, Department of Agriculture.

Authorization: Soil Conservation and Domestic Allotment Act; sections 7 to 15, 16(a), 16(b), and 17, as amended and supplemented (16 U.S.C. 590g-590o, 590p(b), and 590q). The Water Bank Act (16 U.S.C. 1301-1311); and sections 1001 to 1010 of the Agriculture and Consumer Protection Act of 1973 (87 Stat 241 to 246) Identification\_\_\_\_\_

Act of 1973 (87 Stat. 241 to 246). Budget account: 05-60-3317-0-1-354. CFDA: Not listed.

Objectives\_\_\_\_\_

The New National program would provide for three groups of practices, or functions, representing the three basic program objectives: (1) Soil and water conservation, (2) timber incentives, and (3) recreation and wildlife. The primary objective of soil and water conservation would be to encourage farmers and ranchers to carry out whole farm, long term conservation plans. Among the objectives of cost sharing for timber production is the increased supply of saw timber or nonindustrial private lands. The primary objective of recreation and wildlife would be for preserving wetlands for increasing migratory and other waterfowl popula-tions. \$10 million of the cost share funds available each year would be reserved for use in designated emergency areas to finance restoration of damage to agricultural lands caused by natural disaster.

Financial form\_\_\_\_\_ Direct recipient\_\_\_\_\_ Direct payments. Any farmer, rancher, landlord, or tenant who receives

money or benefits under the program.

Subsidy costs\_\_\_\_\_

Fiscal years 1970-74, \$0 (new program—not applicable); fiscal year 1975, \$118,800,000.

gram terminated.

# CAPITAL GAINS TREATMENT FOR CUTTING LUMBER

Authorization ....-

Sec. 691—Gain or loss in the case of timber, coal, or domestic iron ore (a) election to consider cutting as sale or exchange, (b) disposal of timber with a retained economic interest.

Financial form Description\_\_\_\_\_ Tax subsidies. The gain on the cutting of timber is taxed at the rates applicable to long-term capital gains, rather than at ordinary income rates. However, if losses are in excess of the gains, they are treated as ordinary losses. The Revenue Act of 1943 extended sec. 117(j) treatment to income from the cutting or other disposition of timber. It had been observed that, under the 1942 legislation, a taxpayer might obtain capital gains treatment for gains realized on the sale of timber sold outright as a stand, although he would receive ordinary income tax treatment on income derived from cutting the timber. Moreover, gain from the sale of timber, however disposed of, was regarded as accruing over a relatively long period during which the trees matured and, therefore, as not properly taxable in full in the single year in which the gain was realized. ("The Federal Tax System: Facts and Problems," Joint Economic Committee, 1964, p. 69.)

Subsidy costs Fiscal year 1970, \$140,000,000: fiscal year 1971l \$130,000,000; fiscal year 1972, \$175,000,000; fiscal year 1973; \$175,000,000; fiscal year 1974, \$240,000,000; fiscal year 1975, \$260,000,000.

### EXPENSING OF MINERAL EXPLORATION AND DEVELOPMENT COSTS

Authorization Sec. 616—Development expenditures. Sec. 617—Deduction and recapture of certain mining exploration expenditures.

Financial form \_\_\_\_\_ Tax subsidies.

centive for mineral exploration.

Subsidy costs \_\_\_\_\_ Fiscal year 1970, \$340,000,000; fiscal year 1971, \$325,000,000; fiscal year 1972, \$325,000,000; fiscal year 1974, figures unavailable; fiscal year 1975, \$860,000,000.

### EXCESS OF PERCENTAGE OVER COST DEPLETION

Authorization Sec. 611—Allowances of deduction for depletion.

Sec. 612—Basis for cost depletion. Sec. 613—
Percentage depletion.

Financial form\_\_\_\_\_ Tax subsidies.

Description... Extractive industries may choose between two methods of recovering capital costs invested in the development of natural resources. Under one method, actual outlays to the extent not immediately expensible may be deducted as "cost depletion" over the productive life of the property, much as other businesses may take deductions for the depreciation of capital goods. Alternatively, businesses in the extractive industries may deduct a prescribed percentage of gross income (at rates ranging from 27.5 percent for oil and gas to 5 percent for certain minerals, but not more than 50 percent of net income) where such "percentage depletion" exceeds "cost depletion." Percentage depletion is not limited to the cost of the investment as is cost depletion. The basis for "cost depletion" is reduced to the extent certain costs are recovered through expensing of exploration and discovery costs and intangible

allowed as expenses.

The Tax Reform Act of 1969, reduced the rate to 22 percent for oil and gas (formerly 27.5 percent) and also reduced the rate to 22 percent for minerals which were formerly in the 23-percent category. Minerals which were in the 15-percent category were

drilling costs. There is no comparable reduction in "percentage depletion" to allow for costs which are

reduced to 14 percent.

Percentage depletion was adopted in 1926, when the prior allowances based on discovery value in the case of oil and gas proved difficult to administer and produced varying results. At that time, it was recognized that percentage depletion could permit taxpayers to recover amounts in excess of their investments. This was deemed justified on the ground it would have the beneficial effect of stimulating

Discription-Con....

exploration for, and discovery of, new reserves of vitally needed oil and gas \* \* \* In adopting the act, the Congress concluded that if percentage depletion rates are viewed as a needed stimulant at the present time, they were higher than needed to achieve the desired increase in reserves. ("General Explanation of the Tax Reform Act of 1969," p. 156.)

### POLLUTION CONTROL AMORTIZATION

Authorization \_\_\_\_\_

(After 1969 Tax Reform Act) Sec. 169—Amortization of pollution control facilities.

Financial form\_\_\_\_\_

Tax subsidies.
This program was first introduced in the 1969 Tax
Reform Act and will last until December 31, 1974.
Certified facilities with a normal useful life of 15
years or less may be amortized over a period of 60

months.

The Congress recognized that an important challenge facing our Nation is the problem of environmental

pollution.

Congress has addressed itself to the air and water pollution problem in legislation which it has passed in recent years. In order to deal effectively with the Nation's air and water pollution problem, however, it concluded a significant part of the task must be met by private industry. In effect, private industry is being asked to make an investment which, in part, is for the benefit of the general public. It also has been estimated that existing factories which attempt to curb pollution effectively through the addition of antipollution equipment may face significant increases in capital costs. Moreover, expenditures for pollution control equipment generally do not result in any increase in the profitability of a plant.

in any increase in the prontability of a plant.

In the past, companies which installed antipollution equipment involving property of a type for which the investment credit was available received, in effect, an incentive through this credit for dealing with the pollution problem. The repeal of the investment credit, therefore, would have an undesirable effect on the efforts made by private industry to combat pollution were not another type of incentive

to be made available.

To deal with the undesired effect on pollution control of repealing the investment credit and at the same time to deal with the increasing air and water pollution problem facing the Nation, the Congress concluded that it was appropriate to provide an incentive to private industry for antipollution efforts. It concluded, however, that it was more appropriate to permit the rapid recovery of the costs involved than to permit a return in excess of total costs. (This and the previous three paragraphs are quoted from the "General Explanation of the Tax Reform Act of

Subsidy cost \_\_

the previous three paragraphs are quoted from the "General Explanation of the Tax Reform Act of 1969," p. 207-8.)

Fiscal year 1970, \$15,000,000; fiscal year 1971, \$15,000,000; fiscal year 1972, \$15,000,000; fiscal year 1973, \$25,000,000; fiscal year 1974, \$35,000,000; fiscal year 1975, \$40,000,000.

# CAPITAL GAIN TREATMENT OF ROYALTIES ON COAL AND IRON ORE Authorization\_\_\_\_ Section 631—Gain or loss in the case of timber coal or domestic iron ore. (c) Disposal of coal or domestic iron ore with a retained economic interest. Financial form..... Tax subsidies. Description\_\_\_\_\_ Royalties from coal or iron ore deposits are treated as capital gains. The committee believes that the tax treatment now available with respect to coal royalties also should be extended to iron ore royalties as well. The capital gains treatment was made available in the case of coal royalties in part at least to encourage leasing, and therefore production, at a time when the coal and therefore production, at a time when the coal industry was facing strong competition from other forms of fuel energy. Today, domestic iron ore production also generally is decreasing. The capital gains treatment provided by this bill should encourage domestic leasing of iron ore properties to operators, and therefore should improve the position of domestic iron ore production relative to foreign on comesac from ore production relative to foreign production. (House report on Revenue Act of 1964). Fiscal year 1970, \$5,000,000; fiscal year 1971, \$5,000,000; fiscal year 1972, \$5,000,000; fiscal year 1973, \$5,000,000; fiscal year 1974, \$5,000,000; fiscal year 1975, \$5,000,000. Subsidy costs WATER AND WASTE DISPOSAL SYSTEMS FOR RURAL COMMUNITIES Administering agency\_\_ Farmers Home Administration, Department of Agriculture. shipyard with the cost of constructing the same ship in a foreign shipyard.

Financial form....... Direct payments.

Direct recipients...... U.S.-flag ship operators or U.S. shipyards for construction of ships to be used in foreign trade.

A maximum of 39 percent of construction costs in a U.S. shipyard has been established as a goal for fiscal year 1974 with a further reduction of 2 percent per year until a ceiling of 35 percent is reached in fiscal year 1976.

Subsidy costs Fiscal year 1970, \$67,744,000; fiscal year 1971, \$171,412,000; fiscal year 1972, \$279,455,000; fiscal year 1973, \$436,357,000; fiscal year 1974, \$304,-

953,000; fiscal year 1975, \$280,500,000.

## DEFERRAL OF TAX ON SHIPPING COMPANIES

Authorization\_\_\_\_\_ Sec. 954—Foreign base company income (b)(2). Financial form.

Tax subsidies. Description\_\_\_\_

Certain companies which operate U.S.-flag vessel on foreign trade routes receive an indefinite deferral of income taxes on that portion of their net income which is used for shipping purposes, primarily construction, modernization, and major repairs of ships.

Another exception from the application of foreign base company income is provided for income derived from the use (including the hiring and leasing) of aircraft or vessels used in foreign commerce or services directly related to the use of the aircraft or vessels. This exception was provided by your committee primarily in the interest of national defense. In this regard it was believed desirable to encourage a U.S.-owned maritime fleet and U.S.-owned airlines operating abroad. (Senate Report on the Revenue

Act of 1962.)

Subsidy cost\_\_\_\_\_

Fiscal year 1970, \$10,000,000; fiscal year 1971, \$10,000,000; fiscal year 1972, \$10,000,000; fiscal year 1973, \$30,000,000; fiscal year 1974, \$40,000,000; fiscal year 1975, \$40,000,000.

## RAIL FREIGHT CAR AMORTIZATION

Authorization\_\_\_\_\_ Sec. 184—Amortization of certain railroad rolling stock. Financial form.... Tax subsidies.

Description.

This program was first introduced in the Tax Reform Act of 1969. It provides for 5-year amortization of rolling stock in service before January 1, 1975.

Repeal of the investment credit may affect the ability of the railroads to continue their present investment programs at the same pace. Because of the importance to the economy of a healthy railroad industry and the existence of the present shortage of freight cars, the committee believes that an alternative form of incentive to encourage continuation of the present level of investment is needed. (Senate Committee

Report on Public Law 91-172.) Subsidy costs\_\_\_\_\_

Fiscal year 1970, none; fiscal year 1971, \$105,000,000; fiscal year 1972, \$45,000,000; fiscal year 1973, \$80,000,000; fiscal year 1974, \$40,000,000; fiscal year 1975, \$10,000,000.

## AIRPORT DEVELOPMENT AID PROGRAM

Administering agency\_\_ Federal Aviation Administration, Department of Transportation.

Identification\_\_\_\_\_ Authorization: Airport and Airway Development Act of 1970; Public Law 91–258, 84 Stat. 219 et seq. Budget account: 21–20–8106–0–7–501.

CFDA: 20.102 (partial).

Objectives\_\_\_\_\_

To assist public agencies in the development of a nationwide system of public airports adequate to meet the needs of civil aviation. Grants can be made for: (1) land acquisition, (2) site preparation, (3) construction, alteration, and repair of runways, taxiways, aprons, and roads within airport boundaries, and (4) construction and installation of lighting utilities and certain offsite work. Grants may not be made for the construction of hangars, parking areas for automobiles, or for buildings not related to the safety of persons on the airport.

Financial form Direct recipient	Benefits-in-kind. Users of airports and airport facilities. This includes commercial airlines, passengers, and the owners of
Formula requirements  Subsidy cost	private aircraft. Federal Government share of allowable costs of airport development project may not exceed: Fifty percent for sponsors whose airports enplane not less than 1 percent of the total annual passengers enplaned by air carriers certificated by the Civil Aeronautics Board. Seventy-five percent for sponsors whose airports enplane less than 1 percent of total annual passengers enplaned by air carriers certificated by the Civil Aeronautics Board and for sponsors of general aviation or reliever airports. Eighty-two percent for certain items designated in the act. Fiscal year 1970, new program; fiscal year 1971, \$170,000,000; fiscal year 1972, \$280,000,000; fiscal year 1973, \$206,600,000; fiscal year 1974, \$300,000,-000; fiscal year 1975, \$310,000,000.
AIRPO	RT PLANNING GRANT PROGRAM
Administering agency	Federal Aviation Administration, Department of
Identification	Transportation.  Authorization: Airport and Airway Development Act of 1970; Public Law 91–258; 49 U.S.C. 1713.  Budget account: 21–20–8106–0–7–501.
Objectives	CFDA: 20.103.  To assist public agencies in the planning of a nationwide system of public airport adequate to meet the needs
Financial form Direct recipient	of civil aviation.  Benefits-in-kind.  State, county, municipal, and other public agencies are eligible for development of airport master plans if
Formula requirements Subsidy cost	their airport is shown in the National Airport System Plan. Planning agencies must be designated by the Administrator, and also be authorized by the laws of the States or political subdivisions concerned to engage in areawide planning.  The Federal Government provides a maximum of 66% percent of the cost of airport master plans and airport system plans.  Fiscal year 1970, \$10,000,000; fiscal year 1971, \$3,636,035; fiscal year 1972, \$9,043,000; fiscal year 1973, \$10,048,773; fiscal year 1974, \$10,000,000; fiscal year 1975, \$13,000,000.
URBAN	MASS TRANSPORTATION GRANTS
Administering agency	Urban Transportation Administration. Department of
Identification	Transportation.  Authorization: Urban Mass Transportation Act of 1964 and related laws, as amended through Oct. 15, 1970: Public Law 88-365; 78 Stat. 302; 49 U.S.C. 1601 et seq. and Public Law 91-453.  Budget account: 21-32-4119-0-3-503.
Objective	CFDA: 20.500.  Assist State and local public agencies in providing adequate public transportation for all segments of the population; encourage application of new technology; encourage transit improvement programs consistent with regional goals and objectives. Acquisition, construction, reconstruction, or improvement of facilities and equipment for use in public transportation service in urban areas. Excludes maintenance, repairs and other operating costs, and ordinary governmental or nonprofit operating costs. Trans-
	portation may be by bus, rail, or other conveyance, providing service for the public as general or special service.

Financial form	applicants: but private transportation companies may participate through contractual arrangements
Direct recipient	with public agencies. Service benefits are then passed on to users of the transportation facilities provided. Producers and users of the transportation facilities provided.
Formula requirements_Subsidy cost	Grants may not exceed 80 percent of net project costs. Fiscal year 1970, \$132,675,000; fiscal year 1971, \$284,700,000; fiscal year 1972, \$510,000,000; fiscal year 1973, \$844, 208, 000; fiscal year 1974, \$872,000,000; fiscal year 1975, \$1,225,000,000.

# NATIONAL RAIL PASSENGER CORPORATION

	<b></b>
Administering agency	Federal Railroad Administration, Department of

fiscal year 1975, \$72,965,000.

## REGIONAL ACTION PLANNING COMMISSIONS

Regional Commissions, Department of Commerce. Authorization: Title V of the Public Works and Administering agency\_\_ Identification\_\_\_\_\_

Economic Development Act of 1965, as amended (79 Stat. 564).

Budget account: 06-15-2100-0-1-501.

CFDA: 38.001, 28.001, 52.001, 48.000, 63.001.

39-191--74---9

Objectives	The regional development programs are intended to enable States and other entities to take maximum advantage of Federal grant-in-aid programs for the construction or equipping of facilities or the acquisition of land, and to coordinate the national regional economic development effort. Five Commissions covering all or parts of 20 States have been established in the Coastal Plains, Four Corners, New England, Ozarks, and Upper Great Lakes section of the Nation.
Financial form Direct recipient	Direct payments.  State and other entities within the region, generally any political subdivision or private or public non-profit organization. These entities in turn provide public and private benefits similar to the Appalachian and economic development programs.
Formula requirements	Total Federal assistance cannot exceed 80 percent of eligible project costs. The State or community must finance the remaining project costs, not less than 20 percent.
Subsidy costs	Fiscal year 1970, \$17,468,899; fiscal year 1971, \$19,-466,059; fiscal year 1972, \$20,626,382; fiscal year 1973, \$18,814,989; fiscal year 1974, \$6,598,295; fiscal year 1975, \$10,200,000.
	COMMUNITY ACTION
Administering agency Identification	Office of Economic Opportunity. Authorization: 42 U.S.C. 2781 et seq., Economic Opportunity Act of 1964 as amended. Title II: Public Law 88-452.
Objectives	Budget account: 04-37-0500-0-1-999. CFDA: 49.002. To mobilize and channel the resources of private and public organizations and institutions into antipoverty action and to increase the participation of the poor in these activities. Funds are primarily used for
Financial form Direct recipient	projects in health, education, housing, family planning, economic development, employment, day care, community organization, and other services.  Direct cash payments/benefits-in-kind.  Grants to community action agencies, which are either public or nonprofit organizations. Assistance is to be passed on to low-income families and individuals of all ages in low-income urban and rural areas.
Subsidy costs	Fiscal year 1970, \$365,300,000; fiscal year 1971, \$383,-700,000; fiscal year 1972, \$381,741,000; fiscal year 1973, \$396,573,000; fiscal year 1974, \$243,470,000; fiscal year 1975, \$87,183,000.
	MODEL CITIES
Administering agency	Community Development, Department of Housing and Urban Development.
Identification	Authorization: Demonstration Cities and Metropolitan Development Act of 1966, title I as amended. Public I aw 89-754.
Objectives	Budget account: 25-18-0133-0-1-551. CFDA: 14.300.  To provide financial and technical assistance to enable cities of all sizes to plan, develop, and carry out locally prepared and scheduled comprehensive city demonstration programs containing new and imaginative proposals to rebuild and revitalize large slums and blighted areas.
Financial form	Direct cash payments (benefits-in-kind).

Any municipality, county, or other public body having Direct recipient\_\_\_\_\_ general governmental powers (or two or more public bodies jointly) is eligible to be a model city. Limited bodies jointly) is eligible to be a model city. Limited to 150 cities which have already been selected. Services or other assistance is then provided to neighborhood residents, organizations, or other organizations in the targeted area.

Fiscal year 1970, \$308,194,000; fiscal year 1971, \$512,768,000; fiscel year 1972, \$580,750,000; fiscal year 1973, \$644,433,000; fiscal year 1974, \$75,055,000; 1975 proposed for inclusion in the Better Communication.

Subsidy costs.... 1975 proposed for inclusion in the Better Communities Act.

## URBAN RENEWAL AND NEIGHBORHOOD DEVELOPMENT

Community Development, Department of Housing Administering agency\_\_ and Urban Development. Authorization: Title I of the Housing Act of 1949, as amended (42 U.S.C. 1450 et seq.), and section 314 of the Housing Act of 1954, as amended (42 U.S.C. Identification\_\_\_\_\_ 1452a).

Budget account: 25-12-4035-0-3-552.

CFDA: 14.306; 14.307.

Several approaches have been developed to treat Objectives\_\_\_\_\_ slum, blighted, and deteriorating areas. These include conventional urban renewal projects, code enforcement, demolition activities, interim assistance for blighted areas, rehabilitation grants in areas certified for renewal in the near future, and a newer approach involving annual action and funding techniques through neighborhood development programs. Taken together, the various urban renewal activities provide for clearance and redevelopment, rehabilitation, code enforcement, preservation of historic structures, and replacement or installation of community facilities such as schools, libraries, fire stations, and parks. The urban renewal program also provides financial assistance and counseling to homeowners and businessmen in renewal areas so

that they may rehabilitate their properties, or, if necessary, find suitable residences elsewhere.

Direct cash payments (benefits-in-kind).

Funds generally flow through a local public agency Financial form\_\_\_\_\_ Direct recipient\_\_\_\_\_ such as a local or county renewal agency or housing

authority to the businesses and individuals who reside in, work in, or otherwise use the affected area. Fiscal year 1970, \$1,029,000,000; fiscal year 1971, \$927,400,000; fiscal year 1972, \$312,300,000; fiscal Subsidy costs\_\_\_\_\_ year 1973, end of program.

## INDIVIDUAL DIVIDEND EXCLUSION

Section 116.—Internal Revenue Code.  $Authorization_{-----$ Tax subsidies. Financial form\_\_\_\_\_

Individual income taxpayers may exclude up to \$100 Description\_\_\_\_\_

of dividends from income subject to tax.

In 1954 when the present dividend credit and exclusion were adopted, the committee report indicated that these relief measures were provided because the earnings of a corporation are taxed twice, once as corporate income and again as dividend income when paid out to the shareholders (Conference report, Life Insurance Company Income Tax Act of 1959).

This provision has over the years also been supported on the grounds that it encouraged medium taxpayers to own stock.

Subsidy costs\_\_\_\_\_

Fiscal year 1970, \$290,000,000; fiscal year 1971, \$280,000,000; fiscal year 1972, \$300,000,000; fiscal year 1973, \$300,000,000; fiscal year 1974, \$325,000,000; fiscal year 1975, \$340,000,000.

#### INVESTMENT CREDIT

Authorization\_\_\_\_\_

Section 38.—Investment is certain depreciable property. Section 46.-Amount of credit. Section 47.-

Financial form.....

Certain dispositions, et cetera, of section 38 property. Tax subsidies.

Description\_\_\_\_\_

Prior law provided a 7-percent tax credit (3 percent for public utility property) with respect to qualified investment. In general terms, the investment credit was available with respect to (1) tangible personal property; (2) other tangible property (not including buildings and structural components) which was an integral part of manufacturing, production, et cetera, or which constituted a research or storage facility; and (3) elevators and escalators. In addition, the property had to be depreciable property with a useful life of 4 years or more. New property fully qualified for the credit. but in the case of used property only an amount up to \$50,000 could be taken into account in any year. Property with a useful life of from 4 to 6 years qualified for the credit to the extent of one-third of its cost. For property with a useful life of 6 to 8 years, qualification was with respect to two-thirds of the investment, and for property with an esti-mated useful life of 8 years or more, the full amount qualified ("General Explanation of the Tax Reform Act of 1969," p. 187).

The Tax Reform Act of 1969 repealed the investment credit but provided transitional riders, which explain the continued revenue loss reported below. These transitional rules allowed contracts entered before April 19, 1969, for property placed in service through the end of 1975, to be sufficient justification

for the full credit.

Initially, it was generally felt that the investment credit would encourage investment in those types of plant and equipment to which it applies and encourage economic expansion generally when it applies to a broad spectrum. It was repealed in 1969 on the grounds that continued availability of the investment credit during an inflationary period served to offset the effect of anti-inflationary fiscal

Subsidy costs\_\_\_\_\_

and monetary policies.

Fiscal year 1970, \$2,630,000,000; fiscal year 1971, \$910,000,000; fiscal year 1972, \$1,800,000,000; fiscal year 1973, \$3,800,000,000; fiscal year 1974, \$4,300,000,000; fiscal year 1975, \$4,900,000,000.

#### EXCESS DEPRECIATION OF BUILDINGS

Authorization\_\_\_\_

Sec. 167-Depreciation. Section 1250-gain from disposition of certain depreciable realty.

Financial form\_\_\_\_\_ Description\_\_\_\_

Tax subsidies.

To the extent that allowable depreciation for tax purposes exceeds the rate at which assets actually depreciate, business tax liabilities are deferred. Businesses may employ a variety of depreciation schedules for tax purposes, some of which cause a much larger part of asset values to be written off in early years of the asset's useful life than do the schedules used by businesses in their financial statements. The costs cited below are for the schedules

Description-Con \_\_\_\_

which allow building depreciation more rapidly than straightline depreciation. The costs associated with depreciation methods on rental housing is listed

under housing.

The prior tax treatment of real estate was used by some high-income individuals as a tax shelter to escape payment of tax on substantial portions of their economic income. The rapid depreciation methods allowed made it possible for taxpayers to deduct amounts in excess of those required to service the mortgage during the early life of the property. Moreover, because accelerated depreciation usually produced a deduction in excess of the actual decline in the usefulness of property, economically profitable real estate operations were normally converted into substantial tax losses, sheltering from income tax economic profits and permitting avoidance of income tax on the owner's other ordinary income, such as salary and dividends. Later, the property could be sold and the excess of the sale price over the remaining basis could be treated as a capital gain to the extent that the recapture provisions did not apply. ("General Explanation of the Tax Reform Act of 1969." p. 181.)
The 1969 Tax Reform Act curtailed some of these tax

advantages by reducing the depreciation allowances. For example the 200-percent declining balance method was restricted to new residential housing, where it formerly was available to certain other types of new construction as well. The act also tightened the law with respect to recapturing capital gains to the extent that they represent deductions taken under accelerated depreciation, and with respect to the use of accelerated depreciation on used realty.

It is usually suggested that excess depreciation will stimulate modernization and expansion of industrial capacity with resulting economic growth and in-

creased production.

Fiscal year 1970, \$550,000,000; fiscal year 1971, \$500,000,000; fiscal year 1972, \$480,000,000; fiscal Subsidy costs year 1973, \$500,000,000; fiscal year 1974, \$530,000,-000; fiscal year 1975, \$600,000,000.

#### CORPORATION CAPITAL GAINS

Authorization\_\_\_\_\_

(After Tax Reform Act of 1969) Section 1201.— Alternative tax, (a) corporations, (Section 582, Bad debts, losses, and gains with respet to securities held by financial institutions).

Financial form....

Description\_\_\_\_

Tax subsidies.

Capital gains of corporations are subject to a tax of 25 percent while the rate applicable to other corporate income above \$25,000 is 48 percent. Since the corporate tax structure is not graduated (as in the case for individuals) but is computed on the basis of a normal tax of 22 percent of taxable income and a surtax of 26 percent of that part of the taxable income which exceeds \$25,000, usually only those corporations with taxable incomes in excess of \$25,000 (on which the tax rate would be 48 percent, apart from the effect of the surcharge) used the alternative tax.

Because it limited the availability of the alternative capital gains tax for individuals, Congress decided it would also be appropriate to raise the corporate alternative capital gains tax rate. Moreover, it is not clear that a corporation's capital gains are essentially different from its other business income.

Description-Con ....

In addition, since corporations are not subject to graduted tax rates, they usually do not encounter the problem of having bunched income which has accrued over more than a 1-year period and which is taxed in I year at steeply graduated rates ("General Explanation of the Tax Reform Act of 1969", p. 168).

The Tax Reform Act of 1969 increased the capital gains tax rate for corporations to 28 percent in 1970 and 30 percent in 1971 and subsequent years. It also stipulated that net gains of financial institutions on sale of bonds are to be treated as ordinary income

father than capital gain.

Subsidy costs

Fiscal year 1970, \$525,000,000; fiscal year 1971, \$425,000,000; fiscal year 1972, \$380,000,000; fiscal year 1973; \$400,000,000; fiscal year 1974, \$380,000, 000; fiscal year 1975, \$390,060,000.

#### INDIVIDUAL CAPITAL GAINS

Tax subsidies.

Authorization\_\_\_\_\_

Sec. 1014.—Basis of property acquired from a decedent. Section 1201.—Alternative tax. Section 1202.— Deduction for capital gains.

Financial form\_\_\_\_\_

Description\_\_\_\_\_

The tax treatment of capital gains for individuals involves a significant amount of tax subsidies. There are two major aspects to the treatment of capital gains of individuals. One, if the owner of appreciated capital assets dies, the capital gains tax is not applied to appreciation which would have been taxable had he sold the assets just before death. Heirs who receive appreciated property from the decedent and who subsequently sell the property are subject to capital gains tax only on appreciation occurring after they acquired the property. Thus the appreciation on assets held until death is never taxed

under the income tax. Second, as to realized gains, half the gains from the sale of capital assets held

more than 6 months is excluded from income, and in no case is the tax rate applicable to such capital gains allowed to exceed 25 percent.

The Tax Reform Act of 1969 made certain changes in

some of the lesser provisions of the capital gains tax treatment of individuals. For example, treatment of income from the sale of certain things, such as memorandums and letters by a person whose efforts created them, transfer of franchises, trademarks, and trade names where the transferor retains significant rights, was changed from capital gains treatment to ordinary income tax treatment. Another aspect of the act was to eliminate some of the choices regarding treatment of long-term gains. It also increased

the applicable rates.

There are a wide variety of objectives and reasons for the granting of special capital gains treatment, many of which would not be universally agreed upon. However, the provision has often been supported on the grounds that capital gains treatment is to prevent undesirable barriers to the exchange and free-flow

of capital assets.

Subsidy costs

Fiscal year 1970, figures unavailable; fiscal year 1971, \$5,500,000,000; fiscal year 1972, \$5,600,000,000; fiscal year 1973, \$7,000,000,000; fiscal year 1974, \$5,500,000,000; fiscal year 1975, \$6,500,000,000.

## EXCESS BAD DEBT RESERVES OF FINANCIAL INSTITUTIONS

Sec. 160-Bad debt. Sec. 585, sec. 586, and sec. 593-Authorization .... Reserves for losses on loans. Tax subsidies. Financial form\_\_\_\_\_

Description\_\_\_\_\_

Commercial banks, mutual savings banks, building and loan associations, and cooperative banks are permitted to set aside bad debt reserves based on stipulated fractions of deposits, of loans outstanding, or of taxable income before computation for bad debts. The amounts set aside typically greatly exceed actual loss experience and reasonable expectations as to future losses.

The Tax Reform Act of 1969 reduced the gap between The Tax Reform Act of 1969 reduced the gap between actual losses (measured by past experience) and the amount which could be set aside. For additional details on the effect of the Revenue Act of 1969 see the "General Explanation of the Tax Reform Act 1969," pp. 137-144.

Fiscal year 1970, \$680,000,000; fiscal year 1971, \$380,000,000; fiscal year 1972, \$400,000,000; fiscal year 1973, \$400,000,000; fiscal year 1974, \$380,000,000; fiscal year 1975, \$360,000,000.

Subsidy costs\_\_\_\_\_

#### EXEMPTION OF CREDIT UNIONS

Sec. 501-Exemption from tax on corporations, Authorization\_\_\_\_\_ certain trusts, etc. (c) list of exempt organizations (14) credit unions.

Tax subsidies. Financial form\_\_\_\_\_

Credit unions are exempt from Federal income tax. Description\_\_\_\_\_

The justification for this provision appears to go back to earlier treatment in the tax law that exempted the income of mutual savings banks, building and loan associations, and cooperative banks. The principal argument was that such institutions did not really have income that could be taxed. This was based on the theory that both the borrowers and the investors are members of the association and that the interest paid by the borrowers on their loans is really only paid to themselves as members of the association. In other words, it was argued that the mutuality of the borrowing and the investing members is such that no income exists. Such tax treatment was eliminated for these institutions in the Revenue Act of 1951 but continued for credit unions.

Fiscal year 1970, \$45,000,000; fiscal year 1971, \$40,000,000; fiscal year 1972, \$40,000,000; fiscal year 1973, \$90,000,000; fiscal year 1974, \$100,000,000; fiscal year 1975, \$110,000,000. Subsidy costs\_\_\_\_\_

#### EXPENSING OF RESEARCH AND DEVELOPMENT EXPENDITURES

Sec. 160—Bad debt. Sec. 585, sec. 586, and expendi-Authorization\_\_\_\_\_ tures.

Financial form\_\_\_\_\_ Tax subsidies.

Expenditures by businesses for research and develop-Description\_\_\_\_\_ ment (R. & D.) are carried out to find new products or processes, to reduce costs, or for other purposes. In nearly all cases, benefits from such expenditures will accrue for well over 1 year. For tax purposes business may deduct all R. & D. expenditures in the year during which they are incurred, or they may

amortize them over not less than 5 years.

Description—Con ....

To eliminate uncertainty and to encourage taxpayers to carry on research and experimentation \* \* \* these expenditures, incurred subsequent to Dec. 31, 1953, may, at the option of the taxpayer, be treated as deductible expenses \* \* \* also \* \* \* a taxpayer may elect to capitalize \* \* \* and if no other means of

Subsidy costs\_\_\_\_\_

elect to capitalize for and it no other means of amortization is provided, may write them off over a period of 60 months \* \* \* (Senate Finance Committee Report, Revenue Act of 1954.)

Fiscal year 1970, \$565,000,000; fiscal year 1971, \$540,000,000; fiscal year 1972, \$545,000,000; fiscal year 1973, \$570,000,000; fiscal year 1974, \$580,000,000; fiscal year 1975, \$650,000,000.

#### CORPORATE SURTAX EXEMPTION

Authorization..... (After 1969 Tax Reform Act.) Sec. 1561—Limitations on certain multiple-tax benefits in the case of certain controlled corporations. Sec. 279-Interest on indebtedness incurred by corporation to acquire stock or assets of another corporation. Sec. 453—Installment method. Sec. 1232—Bonds and other evidences

of indebtedness. Sec. 249—Limitation on deduction of bond premium on repurchase. Sec. 385—Treatment of certain interests in corporations as stock or

indebtedness. Financial form\_\_\_\_\_ Tax subsidies.

Description\_\_\_\_\_ Corporations pay income tax at a rate of 22 percent on all taxable income plus a surtax of 26 percent on

taxable income in excess of \$25,000 (excluding the temporary surcharge). Each corporation therefore enjoys a surtax exemption of \$25,000. The surtax exception was adopted to benefit small businesses (General Explanation of the Tax Reform Act of

1969, p. 120).

Large corporate organizations have been able to obtain substantial benefits from these prior law provisions by dividing income among a number of related corbusinesses" it is difficult to see why they should receive tax benefits intended primarily for small business, whether or not they have incorporated the businesses separately for business, as distinct from tax, reasons ("General Explanation of the Tax Re-

form Act of 1969", p. 120).

The 1969 Tax Reform Act therefore restricted somewhat the use of this tax advantage by eliminating (over a 6-year period) multiple-surtax exemptions in the case of related corporations. It also makes interest deductions unavailable when "debt" with substantial equity characteristics is used to acquire other

corporations.

Fiscal year 1970, \$2,300,000,000; fiscal year 1971, \$2,000,000,000; fiscal year 1972, \$2,300,000,000; fiscal year 1973, \$2,500,000,000; fiscal year 1974, Subsidy costs\_\_\_\_\_ \$3,100,000,000; fiscal year 1975, figures unavailable.

## EXCLUSION OF INTEREST ON LIFE INSURANCE SAVINGS

Sec. 61—Gross income defined—and case of Fleming (241 F. 2d 78.356 U.S. 260) holding interest added to principal sum of insurance policy not to be in-Authorization\_\_\_\_\_

come at the time added. Sec. 101—Certain death benefits.

Financial form Tax subsidies.

Description	Life insurance policies other than term policies, gen-
•	erally have a savings element in them. Savings in
	the form of policyholders reserves are accumulated
	from the premium payment, and interest is earned
	on these policyholders reserves. Such interest in-
	come is neither taxable as it accrues nor as an
	element of death benefits.
Subsidy costs	Fiscal year 1970, \$1,050,000,000; fiscal year 1971,
	\$1,050,000,000; fiscal year 1972, \$1,100,000,000;
	fiscal year 1973, \$1,200,000,000; fiscal year 1974,
	\$1,300,000,000; fiscal year 1975, \$1,450,000,000.

#### ASSET DEPRECIATION RANGE

Authorization Financial form	26 U.S.C. 167. Tax subsidy.
Description	This provision allows owners of business property to
	depreciate this property for tax purposes much faster than the property actually depreciates. This
	depreciation is faster than that used for other
	accounting purposes such as reports to stockholders of the Securities and Exchange Commission.
Subsidy costs	Fiscal years 1970-71, \$0; fiscal year 1972, \$700,000,000;
	fiscal year 1973, \$860,000,000; fiscal year 1974, \$1,250,000,000; fiscal year 1975, \$1,500,000,000.

#### ECONOMIC DEVELOPMENT ASSISTANCE

Administering agency	Economic Development Administration, Department of Commerce.		
Identification	Authorization: Public Works and Economic Development Act of 1965; Public Law 89-136, as amended by Public Law 90-103, 91-123, 91-304, 92-65, 93-46; 42 U.S.C. 3131, 3135, 3141, 3142, 3161, 3171.		
	Budget account: 06-10-2050-0-1-507.		
Objectives	CFDA: 11.300, 11.301, 11.303, 11.304.  To assist in the construction of public facilities needed to initiate and encourage long-term economic growth and to stimulate private investment by providing low-interest, long-term loans to help business expand or establish plants in redevelopment areas for projects that cannot be financed through private lending institutions.		
Financial form	Direct loans and guaranteed/insured loans.		
Direct recipient	The public portion of this program goes to States or		

their subdivisions, Indian tribes, or nonprofit organizations representing a redevelopment area. Individuals and corporations are eligible for the business loans.

business loans.

Fiscal year 1970, 6 percent, 16 years; fiscal year 1971, 6.94 percent, 16.8 years; fiscal year 1972, 5.88 percent, 17.2 years; fiscal year 1973, 6 percent, 18.7 years; fiscal year 1974, 6.62 percent, 32.3 years; fiscal year 1975, 6.62 percent, 32.3 years; fiscal year 1970, \$5,740,000; fiscal year 1971, \$5,170,000; fiscal year 1972, \$440,000; fiscal year 1973, \$3,760,000; fiscal year 1974, \$1,590,000; fisca Interest rate and maturity.

Subsidy costs\_\_\_\_\_ 1975, \$1,410,000.

## SMALL RECLAMATION PROJECTS

Bureau of Reclamation, Department of the Interior. Authorization: Small Reclamation Projects Act; Public Administering agency\_\_ Identification\_\_\_\_\_ Law 84-984; 43 U.S.C. 422 a-k. Budget account: 10-60-0667-0-1-401. CFDA: 15.503.

Objectives\_\_\_\_\_ To provide fully reimbursable Federal loans and possible grants to public non-Federal organizations for rehabilitation and betterment or construction of water resources development projects located in the 17 westernmost contiguous States and Hawaii. Loans and/or grants up to \$10,000,000 for projects whose total cost cannot exceed \$15,000,000 and which can be single purpose irrigation or drainage, or multipurpose, including municipal and industrial water supplies, flood control, fish and wildlife, recreation development, and hydroelectric power. Construction grants can be made for costs allocated to flood control and for a portion of the costs allocated to fish and wildlife enhancement and recreation development, if such development is of general public benefit. Loan application report, water rights, and rights-of-way costs must be contributed by applicant. Financial form\_\_\_\_\_ Direct loans. Public non-Federal organizations, organized under State law, and eligible to contract with the Federal Direct recipient\_\_\_\_\_ Government, and who can demonstrate engineering and financial feasibility of project proposal.

This program is included in Irrigation Systems Leans. Interest rate and maturity. Subsidy costs\_\_\_\_\_ See Irrigation Systems Loans. IRRIGATION SYSTEMS LOANS Bureau of Reclamation, Department of the Interior. Authorization: Distribution System Loans Act; Public Law 84-130; 43 U.S.C. 421 b, c. Budget account: 10-60-0667-0-1-401. Administering agency\_\_ Identification\_\_\_\_\_ CFDA: 15.501, 15.502. Objectives\_\_\_\_\_ To provide fully reimbursable Federal loans to organized irrigation districts with lands included within congressionally authorized reclamation projects to plan, design, construct, and rehabilitate irrigation and municipal and industrial water distribution or drainage systems in lieu of Federal construction. Financial form\_\_\_\_\_ Direct loans. Direct recipient\_\_\_\_\_ Irrigation district must be organized under State law and eligible to contract with the United States; must have water service contract with the Bureau of Reclamation. Formula requirements\_\_ Applicants must contribute all costs for preparation of loan application report and up to 10 percent of total project cost including money, labor, lands, or interproject cost including money, labor, lands, or interests in lands to be used for project purposes.

## URBAN RENEWAL PROJECTS

Administering agency\_\_ Community Development, Department of Housing and Urban Development. Identification \_\_\_\_\_ Title I of the Housing Act of 1949, as amended; 42 U.S.C. 1450-1468a; Public Law 81-171. Budget account: 25-12-4034-0-3-551. CFDA: 14.307. Objectives\_\_\_\_\_ To assist local communities in the elimination of slums and blighted or deteriorated or deteriorating areas in preventing the spread of slums, blight, or deterioration, and in providing maximum opportunity for the redevelopment, rehabilitation, and conservation of such areas by private enterprise. Financial form\_\_\_\_\_ Direct and guaranteed/insured loans. Direct recipient\_\_\_\_\_ Local public agencies which can be a local or county renewal agency or housing authority, or a local or county department of government—depending upon State enabling legislation. Interest rate and Varies with the type of loan. maturity. Fiscal year 1970, \$14,020,000; fiscal year 1971, \$9,780-000; fiscal year 1972, \$18,970,000; fiscal year 1973, \$105,900,000; fiscal year 1974, \$25,610,000; fiscal Subsidy costs\_\_\_\_\_ year 1975, \$20,550,000.

## EXCESSIVE TAX AND LOAN ACCOUNT BALANCES

Department of the Treasury. Authorization: Not available. Budget account: Not included in budget. Administering agency\_\_ Identification.... CFDA: Not listed. Objectives\_\_\_\_ The principal purpose of the system originally—to promote the smooth functioning of the economy by reducing the impact of Government financial operations on the distribution and level of bank reserves and on the money market-is still of major importance. The peaks and valleys in the timing of the flow of money between the public and the Government would be, without some device for smoothing them out or compensating for them, of sufficient magnitude to cause sharp changes in bank reserves resulting in undesirable fluctuations in money market interest rates and in the availability of loanable funds in the banking system. Treasury tax and loan accounts were devised to prevent these drastic swings. As taxes are paid and as banks subscribe for new issues of designated Treasury securities (for their own or customers' accounts), the funds are transferred on each bank's books from the payer's account to the Treasury's tax and loan account. The Treasury can then draw down the tax and loan balances as it actually needs funds to cover disbursements, thereby matching the flow of collections with the flow of payments, minimizing their impact on bank reserves and the money market. Benefits-in-kind.

Private banks that hold these balances.

A study made by the Department of Treasury in June 1974 estimates that \$300 million is representative of the annual cost.

#### U.S. POSTAL SERVICE

U.S. Postal Service.

Administering agency\_\_

Objectives\_\_\_\_\_

Administering agency	U.S. Postal Service.
Identification	Authorization: 39 U.S.C. 2101-2202, Postal Reorgani-
	zation Act of 1970, Public Law 91-375.
	Budget account: $32-10-1001-0-1-505$ .
	CFDA: Not listed.
Financial form Direct recipient Subsidy costs	The postal subsidy is intended to provide certain types of services at charges less than their costs. Congress has specifically authorized by legislation that certain classes of mail should be provided at reduced rates, for example, the cost of mail service to nonprofit organizations. Similarly, Congress has authorized the provision of special services and public service operations. Examples of these include collect-on-delivery and maintenance of postal facilities in rural areas too small to be self-supporting.  Benefits-in-kind.  Users of the postal services which are specifically subsidized and those authorized reduced rates.  Fiscal year 1970, \$1,510,000,000; fiscal year 1971, \$2,183,000,000; fiscal year 1972, \$1,772,000,000; fiscal year 1973, \$1,567,000,000; fiscal year 1974, \$1,999,000,000; fiscal year 1975, \$1,553,000,000.
SURPLUS LAND FOR COMMUNITY DEVELOPMENT	
Administering agency	Community Planning and Development, Department of Housing and Urban Development.
Identification	Authorization: Title I of the Housing Act of 1949, section 108, Public Law 81-171, 63 Stat. 413, 414, 42 U.S.C. 1450; Housing and Urban Development Act of 1969, section 414, Public Law 91-152, 83 Stat. 404, 40 U.S.C. 484; Housing and Urban Development Act of 1970, sections 723, and 919, Public Law 91-609, 84 Stat. 1770, 1814.  Budget account: 25-30-3980-0-4-551. CFDA: 14.211.
Oh ! 4!	(D)

CFDA: 14.211.

To provide a national demonstration designed to create complete new communities and neighborhoods on surplus Federal land in urban areas. To demonstrate a joint public-private capability to create total new communities rather than simply more housing projects as recidential subdivisions. ects or residential subdivisions. Benefits-in-kind.
